Amexco and UK bank in card deal

By George Graham, in London

American Express, the US-based payments card company, yesterday advanced its plans for rapid expansion in Europe with an agreement allowing National Westminster Bank of the UK to issue an Amex hrand credit card.

The deal follows a rehuke issned in May by the European Commission to Visa, American Express's rival in the payments industry, over its efforts to prevent its member banks issuing competing cards such as Amex.

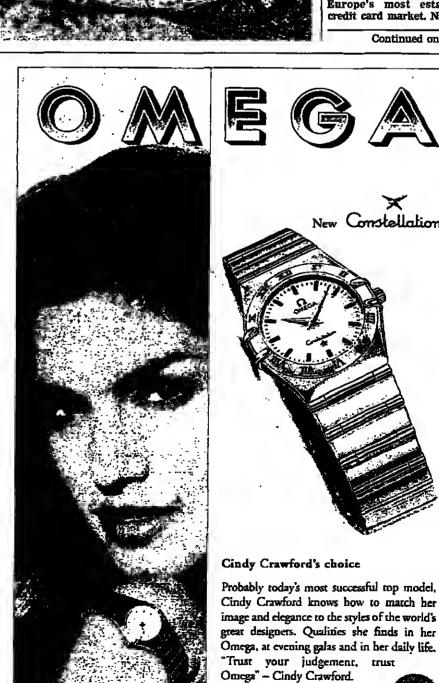

"Europe has become the easiest place to work because the EU has warned off Visa and MasterCard," said Mr John de Trafford, American Express country manager for the lik and Ireland.

American Express traditionally concentrated on issuing its own charge cards, which id to be paid off each month. It retained a strong position in corporate travel cards, hot as its share of the overall payments market was eroded it decided this year to seek partners in the banking industry.

American Express had aiready signed deals with banks in Ireland, Spain, Portugal and Greece, hut yesterday's NatWest deal is its most significant breakthrough in Europe's most established credit card market. NatWest's

EU entrants 'must sign up for Emu'

MEPs' hard-hitting report endorses enlargement of the Union but says it will be far from easy

By Caroline Southey in Strasbourg

Countries wanting to join the European Union will have to endorse the objectives of monetary union and adjust economic policies accordingly, according to a European parliament report.

MEPs are today expected to endorse a hard-hitting report on the EU's enlargement strategy which lists a host of obstacles to absorbing countries from eastern and central Europe into the EU. Although it endorses the political objective of enlargement, it sets out starkly the tasks the Union of economic changes aspirant must face before it can realise the goal, and the economic reforms that applicant states must intro-

Countries joining "must be able institutions of a market economy applicant country and ending in money from structural funds on to meet the obligations of full member states, and, above all, endorse the objectives of economic and monetary union", the report warns. It points out that Emu is part of the EU's acquis communautaire (the core body of EU legislation) which new member states will have to accept as an "eventual objective". As a result they will have to "commit themselves to pursuing an economic policy consistent with that objective".

The report, by the parliament's hudgets committee, sets out a list members will have to put in place. pointing out that "even countries which have made considerable progress towards aetting up the period tailored to the needs of each (\$62bn), while that of paying out posals not yet agreed.

[as in the Czech Republic] continue to have difficulties, particularly in terms of inflation and interest

Applicant countries are urged to large enterprises, reforms of their public sectors and financial able to expand unless it reforms its initiative". This process will structural funds and the common "require years and substantial

The report warns against "hasty enlargement" and rules out "accession en bloc" which it considers cations of enlargement differ unrealistic given the differences in the economies of tha applicants. Instead, it argues there should be a agricultural policy range from short and "specific pre-accession

certain accession".

Also listed by the report are issues the EU will have to tackle if it wants to absorb new members. The cost is seen as the most seripress ahead with privatisation of our obstacle, and the report maintains that the Union will not be systems, and to "encourage private two biggest financial regimes: • The parliament yesterday

EUROPEAN NEWS DIGEST

EU industry output rises

Industry in the European Union yesterday reported the first increase in manufacturing output for 13 months amid a further general improvement in business. confidence. A European Commission survey of more than 25,000 companies showed sentiment continued to recover from its trough earlier this year. Manufacturing conditions improved in 11 countries including the key German market, but deteriorated in France.

A spokesman for the European Commission said resterday: "Now we are in a position in industry where we can say there is sustained growth." This was underpinned by an upturn in export orders. But stocks were still relatively high and more companies expected to cut prices than to raise them. Consumer confidence, unchanged between October and November, was on a slowly improving trend. Graham Bowley. Economics Staff

New Bremer Vulkan probe

The European Commission yesterday announced a further state aid probe at Bremer Vulkan, Germany's largest shipbuilding group. The latest investigation concerns DM300m (\$192m) in loans granted to its former shipyards in east Germany. Brussels is already investigating some DM788m of public money diverted from the group's ailing east German yards to the mother company in west Germany.

The competition authorities in Brussels said they could not accept a German argument that the DM300m did not have to be notified in advance to Brussels on the grounds that it was a replacement for the missing aid. According to the Commission, the German authorities have asked permission for a new aid package worth almost DM1bn to rescue the two east German yards.

■ Brussels yesterday informed the Belgian authorities that it could not accept the status enjoyed in Flanders by VTM, the region's principal television station, which has a monopoly on television advertising. VT4, a competing channel, has been forced to broadcast from London to circumvent the advertising rules. Emmo Tucker, Brussels

Inflation dips in Germany

FUTURES

OPTIONS & FOREX

Union

Limited

Germany's annual inflation rate dipped to 1.4 per cent last month from 1.5 per cent in October, the federal statistics office said. The rate of increase has now hovered about 1.5 per cent since the summer, slightly lower than earlier in the year. The cost of living index fell by 0.1 per cent between October and November. The steepest price rises during the month were for food and drink, particularly fish and fresh vegetables, but a fall in energy costs helped offset these increases.

Inflation in the former east Germany was slightly higher. The cost of living index rose by 0.1 per cent between October and November and the annual rate increased from 1.5 per cent to 1.6 per cent. Ralph Atkins, Bonn

APPEAL TO THE GOVERNMENTS OF THE 15 MEMBER STATES OF THE EUROPEAN UNION

This appeal, launched in Valencia a year ago, is made by 2,500 mayors and political leaders of cities and municipalities, presidents of counties, (départements, provinces) and regions of the European Union, and their representative organisations, to the Intergovernmental Conference on the occasion of the European Council of Dublin on 13-14 December 1996.

We call on the Intergovernmental Conference to use the next stage of European development to bring the Union closer to its citizens by defining fundamental rights and by clarifying the functioning of European processes, and by

- A guarantee of the right of citizens to manage a substantial share of public affairs through locally elected assemblies, by incorporating the principles of the European Charter of Local Self Government;
- A broader expression of the principle of subsidiarity and its application to recognise the place of local and regional government;
- A basis for partnership between the various levels of government where local and regional authorities have responsibility for implementing European policy; A greater measure of organisational independence and a guarantee of the democratic legitimacy of the

Committee of the Regions which should become an institution with a fair and balanced representation of the local and regional authorities in each member state to ensure its effective contribution to European policy-

We wish the governments of Europe assembled in the Intergovernmental Conference every success in shaping a future Europe which can advance with the confidence of its people.

The exodus of German in the past three years. companies relocating production abroad shows no sign of abating in the next three years as the disadvantages of remaining at home - particularly bigh labour costs - continue to bite, according to a survey pub-

DIHT, the umbrella body for the country's chambers of industry and commerce, found 28 per cent of west German industrial companies plan to shift production abroad in the next three years. That compared with

relocated production abroad The results come amid

in federal government war gains. But a landmark nomics and social acience institute, showed that nniona representing 2m employees had struck deals in the past week which kept sick pay at 100 per cent of

Meanwhile, domestic Luftthreatened with warning

strike action tomorrow after

crews and some ground staff which could affect a number of airports.

The DIHT survey, based more than 6,000 rasponses, found labour costs cited by 62 per cent of industrial companies as the main reason for locating tially compensated with abroad. The next most important reason, cited by 21 per cent, was tax and other charges. Middle and east European states remained bansa airline flights are the most popular alternative location.

DIHT said the results dem-

two-hour stoppages by flight under-estimated. "Where production is relocated, the higher productivity and better training of German workers are not covering wage

costs and increasingly high additional wage costs." Figures earlier this year from the Bundesbank showed investments abroad

by German companies nearly doubled in 1995 to a record DM50bn (\$32bn). The DIHT survey suggests the trend will remain upwards. with 38 per cent of west German industrial companies expected to increase foreign investment in 1997 against

Germans flee high labour costs defence act together

ing. While executives in the US defence industry trade companies like cocoa futures in an unprecedented wave of consolidation, their European counterparts can barely cobble together a sin-

In the US, Boeing's acquisition of \$3hn-worth of Rockwell's defence business causes barely a ripple, while General Motors confidently expects to be able to auction its Hughes misslies and radar operations for \$8bn-\$10bn in the next few months. In Europe, it bas taken British Aerospace and Matra more than three years to negotiate a missiles joint venture with a turnover of around \$1.5bn.

This painfully slow progress was set back still further by the collapse last week of French attempts to privatise the Thomson-CSF defence electronics group. If European governments cannot even get their defence companies into the private sector, say despairing executives, what bope is there for cross-border mergers and acquisitions?

The problem has been exacerbated because, as defence budgets are cut, international collaborative programmes, which offer a basis for companies to work together across borders, are often the first to go. France, for example, threatened to cut back on two Franco-German belicopter programmes and European military transport aircraft in its budget last spring. Germany threatened to retaliate by pulling out of a Franco-German spy satellite programme.

While the belicopters and satellite were reinstated at Monday's Franco-German summit, the Future Large Aircraft transporter still bas no funding.

Efforts to overcome this splintering are focused on two main poles: aircraft manufacturing and defence electronics. In rationalising aircraft

explored. The first could duplication.

Merging the the Lagardère missiles-totwo could cut duplication. and it would be possible to include an Aérospatiale-Dassault grouping, once the French company had been rationalised and privatised. Unfortunately, Daimler-Benz seems reluctant to sup-

> **Bernard Gray** on Europe's continuing failure to merge its arms industries

ply the cash needed to

ratinnalise its aerospace sub-

sidiary. BAe is concerned that once Daimler's defence side is no longer seen as "German" the Bonn government will rapidly reduce its commitment to the expensive Eurofighter programme.

The alternative is to try to bind the companies' civil aerospace interests more tightly in Airbus, forming a vehicle which could eventually accommodate military aerospace. Airbus is moving towards being an incorporated company, rather than a loose alliance, but it says that this process will take at least two years to complete. Meanwhile. Airbus is trying to expand its military business with the Future Large Aircraft, the very programme which bas just bad its funding cut.

In the case of of electronics sub-systems makers, the two most important companies are Thomson-CSF and GEC-Marconi, the defence subsidiary of GEC of the UK. Both bave many common operations in areas such as airborne radar, missiles, sonar and avionics. As with production capacity, two BAE and Daimler, merging principal avenues are being would cut considerable

tors for the £40hn (\$66bn) decided to sell Thomson to magazines conglomerate

The financial structure proposed by Lagardère would not have allowed a full merger with GEC, bowever. While the privatisation of Thomson is once again in flux, a full merger with GEC seems unlikely.

In the abaence of concerted efforts by industrialists and politicians, the routes to cross-border deals seem very difficult. As a result, industry executives, desperate for some sort of action, are beginning to consider easier mergers into national groupings.

These would not offer the same rationalisation benefits but would cut some costs. Daimler-Benz Aerospace already incorporates much of the German defence electronics as well as aircraft industry, France might end up with Thomson-CSF, Dassault and Aérospatiale in one group, and Britain might see the much-touted but elusive merger of BAe and GEC's defence interests.

Some executives argue that if Europe is likely to end up with a single aerospace company incorporating aircraft, missiles and electronics, theo, as a first step, national rationalisation of aircraft makers and electronics companies is as valid as the international mergers into one aircraft maker and one electronics company.

Yet such national groups risk becoming national champions, raising competition worries. Governments may also retreat from international collaboration where they feel their champions may lose out. Unless there is a breakthrough on international rationalisation soon, companies could retreat into national laagers from which it will be impossible to challenge the US giants. Last week's developments in France are not an encourag-

Bonn, Prague agree terms of reconciliation

By Frederick Stüdemann in Berlin and Vincent Boland

Germany and the Czecb Republic have finally agreed a draft declaration of historical reconciliation in which both sides acknowledge crimes committed during and after the second world war, and Bonn for the first time strongly backs Prague's claims to membership of the European Union

The declaration aims to close a traumatic chapter in German-Czecb relations which began in 1938 when Hitler took advantage of Czecboslovakia's ethnic German minority in the beavily fortified Sndetenland border districts to begin bls systematic destruction of the neighbouring republic and the rest of Europe.

In the declaration Germany apologises for the Nazi occupation of Czechoslovakia and acknowledges this created the climate in which 2.5m ethnic Germans were expelled from the Sudetenland immediately

after the war and their property confiscated. The Czech side expresses remorse for the crimes committed during the expulsions, one of the biggest forced resettlements in Europe this century, during which many fleeing refugees were murdered.

The expulsion of ethnic Germans from Sudetenland and thousands of ethnic Hungarians from eastern Slovakia was authorised by the victorious Allies under the Pntsdam agreement in 1945. They were supposed to take place in an "orderly and bumane" way, but were Lingering anger at the

"fifth column" role played by many ethnic Germans in 1938 followed by decades of Soviet-style "proletarian solidarity" with east Germany prevented public discussion of the expulsions until the "velvet revolution" of 1989. President Václav Havel was widely criticised when he apologised to a German andience in one of his first speeches as president.

In this archive picture, Czechs gather with their helongings at a station on the Czech-German border. They are waiting for a train so they can leave their bomes in October 1938 after the Nazis annexed the Sudetenland

great majority of embittered for Prague's drive to join properties and because the Sudeten refugees in Bavaria, where they form a vocal and powerful political pressure group within the Christian Social Union (CSU), made it equally difficult for the German government to find a mutually acceptable form of wording for the bilateral declaration. Agreement took nearly two years.

The Czech expression of remorse in the declaration is stronger than many Czechs expected and was a trade-off But the settlement of the for explicit German support sible return to their former

western institutions, analysts said. To date Bonn has beld back on giving the Czech Republic the clear endorsement it gave Poland, which moved much more quickly to reach its own reconciliation with Germany.

Czech reaction to the draft was muted yesterday, with political leaders insisting it making provision for a posexpression of regret was not explicit enough. The draft declaration,

which also provides for creation of a DM165m (\$106m) fund for social and cultural initiatives, is due to be initialled on December 20 by foreign ministers before being formally signed by Chancellor Helmut Kohl and was fair to both sides. But it Prime Minister Vaclay was attacked by Sudeten Klans in Prague next leaders in Germany for not month. It will then require approval by both parlia-

Nato steps up pressure on Milosevic

By Laura Silber in Belgrade and Bruce Clark in Brussels

Nato foreign ministers yesterday deplored the authoritarian behaviour of the Serbian government and called for greater efforts to bring war criminals in Bosnia to justice.

The ministers called on President Slobodan Milosevic to recognise the opposition's municipal election victory last month and to avoid using force against demon-

Their call came as tens of thousands of people yesterday turned out for the 22nd day of protest against the cancelletion of elections. Yugoelavia's federal court also rejected an appeal from the Belgrade electoral commission to overturn an earlier court ruling, epparently exhausting legal evenues to restore opposition victories

in the November 17 poll. Western diplomats were not surprised by the court decision. "Milosevic seems to be waiting for a critical mass, to see if the demonstrations and the western pressure continue. If so, he can still find a legal way out," said one

slavia, which could return the decision to the courts.

Opposition deputies to federal parliament yesterday boycotted its first session, since Mr Milosevic's ruling Socialists and the communist partners of his wife captured a majority in a first round of polling on Novem-

The opposition coalition Zajedno (Together) won municipal elections, which were later annulled, but lost the poll for the federal

Nato ministers also called yesterday for an intensified effort to bring war criminals to justice, but it seemed very unlikely the alliance's cautious rules of engagement in Bosnia would change. · Canada proposed that

Nato alter its posture to restrict the movement of indicted persons such as Mr Radovan Karadzic and ultimately apprehend them. However, most other countries focused instead on boosting the resources of the international war crimes tribunal in The Hague.

Under current rules, Nato forces are supposed to arrest any war crimes suspects ut," said one that they "come across", but

General John Shalikashvili vesterday laid out parameters for the deployment of US troops ovarseas that seem markedly different political leadership. from the more cautious approach of Gen Colin Powell, his predecessor as chair-

Yesterday he stressed the US would "pay any price" when its vital interests were clearly at risk.

But whereas Gen Powell ties of the "hipolar" cold. war, he went on, "in today's world we need to consider the use of milltary forces when America's other important interests are threat-

These could include economic and humanitarian considerations, he added. Broader US engagement would have to be "selective" so as to avoid the risk of "exhaustion, militarily and psychologically" but the US should be "sure to protect an environment that is most helpful to our aims."

Gen Shalikashvili did not rule out Nato intervention, with full US participation, to alleviate humanitarian disasters in "out of area" countries such as Rwanda. He said he had discussed this possibility with Mr Boutros Boutros-Ghali, the United Nations secretary-general.

When I was at SACEUR (Nato's European command). the out-of-area debate was a hot issue, but who now thinks it's a hot issue?" he asked rhetorically, It was entirely logical for Nato to control role in distant humanitarian operations.

little doubt that if SFOR, the smaller successor to the Nnto IFOR detachment in Bosnia, needed reinforcement, then it would be so ordered by the alliance's

But governments also had to ensure that their respective publics understood the overseas. He cited Somalia in 1993 as the classic example of a nation taken by "surprise" when the US misadverse domestic political consequences on foreign pol-

His general approach was much in line with the thinking of Mrs Madeleine Albright, nominated last week by President Bill Clinton as the next secretary of state. Their common backgrounds as refugees from eastern Europe was a factor, he acknowledged, and he expressed appreciation for her strong support for the US military.

But Gen Shalikashvili also placed limits on what the US military could do. He did not think it should conduct the sort of "police" work more appropriate to combat international narcotics and by Mr Bob Dole, the losing Republican candidate in last month's presidential elec-

He was also "strongly opposed" to the creation of a US contingent force specially trained in peacekeeping.

force," he said, "is made up of the most competent soldiers" able to handle any military eventuality. "If you do it the other way round," the risks to US lives could be unacceptably high,

Make your world a simpler place.

Imagine all the complexities of communications between your foreign offices reduced to one single source solution.

A solution that provides true end-to-end control of all your voice, fax and low bandwidth data traffic worldwide. Bringing you ongoing monitoring, sizing and maintenance of your capacity with the appearance, functionality and flexibility of a dedicated private network, at just a fraction of the cost.

A solution that eliminates the need for multiple carriers, multiple ordering and installing, multiple billing and the need to rely on uncoordinated service teams.

A solution that efficiently handles your contract, provisioning, performance, trouble management, discounting and billing.

What you've just imagined is Global VPN, created by Global One to make the business of international communications a simpler one indeed.

Global VPN was built on the expertise and infrastructure of our parent companies, Deutsche Telekom, France Telecom and Sprint.

Together, we rapidly expanded our global platform to deliver a highly reliable, true single source for your virtual networking needs, your questions, your forward thinking.

Global VPN. One more innovative solution from Global One to make doing worldwide business a simpler thing to do.

NOW YOUR WORLD IS ONE.

Digital to pay \$6m for RSI

Digital Equipment, the US computer manufacturer, has been ordered to pay almost \$6m to three women who suffered arm and wrist injuries while using Digital Brooklyn, is believed to be the first of its kind against a keyboard manufacturer.

One of the plaintiff's lawyers said it was the largest US award for carpal tunnel syndrome, one of the most serious forms of repetitive stress injury (RSI). Thousands of similar suits have been filed against IBM, Apple, AT&T and other computer companies, but in previous cases, which have come to court juries have found in favour of

In the Digital case, the jury found no evidence that the keyboards bad defective designs but ruled that users should have been warned of the dangers of excessive keyboard work. The largest award - more than \$5m went to Ms Patricia Geressy, a former employee of the Port Authority of New York and New Jersey and the mos severely injured of the three plaintiffs.

Digital said that it "prides itself on providing

information to customers and employees about the comfort and safe use of its products." It said it would seek to have the verdicts set aside by the trial court and if necessary would appeal. Tracy Corrigan, New York

New team for Miami crisis

Florida has appointed a team of live to oversee Miami's. budget after declaring a state of emergency in the city's finances last week.

Mr Lawton Chiles, the governor, appointed Lt Gov Kenneth "Buddy" MacKay and four Miami business and government officials to help deal with a city on the verge of bankruptcy. Mr MacKay said the panel's role would be advisory and that city commissioners would still have to come up with their own solution to deal with the \$68m budget deficit.

Mr Chiles said that declaring bankruptcy was not a viable option. Mayor Joe Carollo of Miami said he would unveil proposals tomorrow for narrowing the hudget gap without raising property taxes or doubling garbage fees. He said that would require \$50m to \$60m in new, recurring revenues. See Observer, Page 13

US drugs chief in Mexico

Gen Barry McCaffrey, director of the US Office of National Drug Control Policy; was in Mexico yesterday to meet Mr Jorge Madrazo, the country's seventh attorney general in as many years. He was also due to meet Gen Jesús Cutiérrez Rebollo, Mexico's new anti-narcotics chief, the latest in a series of military officers who have taken prominent posts in President Ernesto Zedillo's administration.

US and European diplomats were dismayed at the summary dismissal last week of Mr Antonio Lozano, the former attorney-general. "Two years of patient contact building have been wasted," one diplomat said: ...

The general had warm words for Mr Lozano, who drafted the first law against money laundering in Mexico. "Mr Lozaño took tremendous, courageous action against-drug corruption in the country," the general said, saying he was looking forward to getting to know Mr Madrazo. Leslie Crawford, Mexico City

Cali drug cartel undefeated

The leaders of the Cali drug cartel are still running the world's largest drug syndicate, even as they await sentencing in a Bogota jail, according to Colombia's police

Police raided the maximum-security La Picota prison on Sunday, and found documents with cartel leaders' plans to bribe congressmen and instructions on how cocaine-laden aircraft could evade radar. US officials said previously cartel leaders, arrested in a crackdown that began last year, were trafficking from jail.

homes fuse

An Israeli planning committee yesterday approved plans to build a Jewish neighbourhood in an Arab section of East Jerusalem, a decision which could set Israelis and Palestinians on a collision course.

The plan to build 132 homes for Jews in the heart of Ras el-Amud, where 11,000 Palestinians live, still requires

ministers' approval. Palestinians and Israeli peace activists yesterday warned that implementing the plan could lead to a

widespread protest. In a public hearing this week, Ir Shalem, an Israeli organisation acting on behalf of Arab-Palestinian rights

in Jerusalem, said the plan was illegal. Mr Daniel Seidemann, legal adviser of Ir Shalem, said the movement would take the case to the supreme court if approved. He said Mr Benjamin Netanyahu, the Israeli

prime minister, would "not be able to absolve himself of responsibility" if the plan was pushed through. A spokesman for Mr Netanyahu said the plan was at a very preliminary stage.

Avi Machlis, Jerusalem

Rawlings beads for re-election

President Jerry Rawlings, who has dominated national life in Ghana for almost two decades, was within sight of a historic election victory yesterday as the first incumbent to be re-elected since independence in 1957. Only a late surge by Mr John Kufuor of the opposition's Great Alliance could force the race into a second round.

With results in from 139 of the 200 constituencies in Saturday's presidential and parliamentary elections, Mr Rawlings enjoyed a comfortable lead with 54 per cent of votes. Mr Kufuor had 43.7 per cent, according to the results from the National Election Commission. The third contender, Mr Edward Mahama of the People'e National Convention, trailed with 2.3 per cent of votes.

Since independence from Britain, all Ghana's elected governments have been toppled before serving out their terms. In results so far in the parliamentary ballot, the president's National Democratic Congress party had 88 seats in the 200-seat assembly. The combined opposition bad 51 seats.

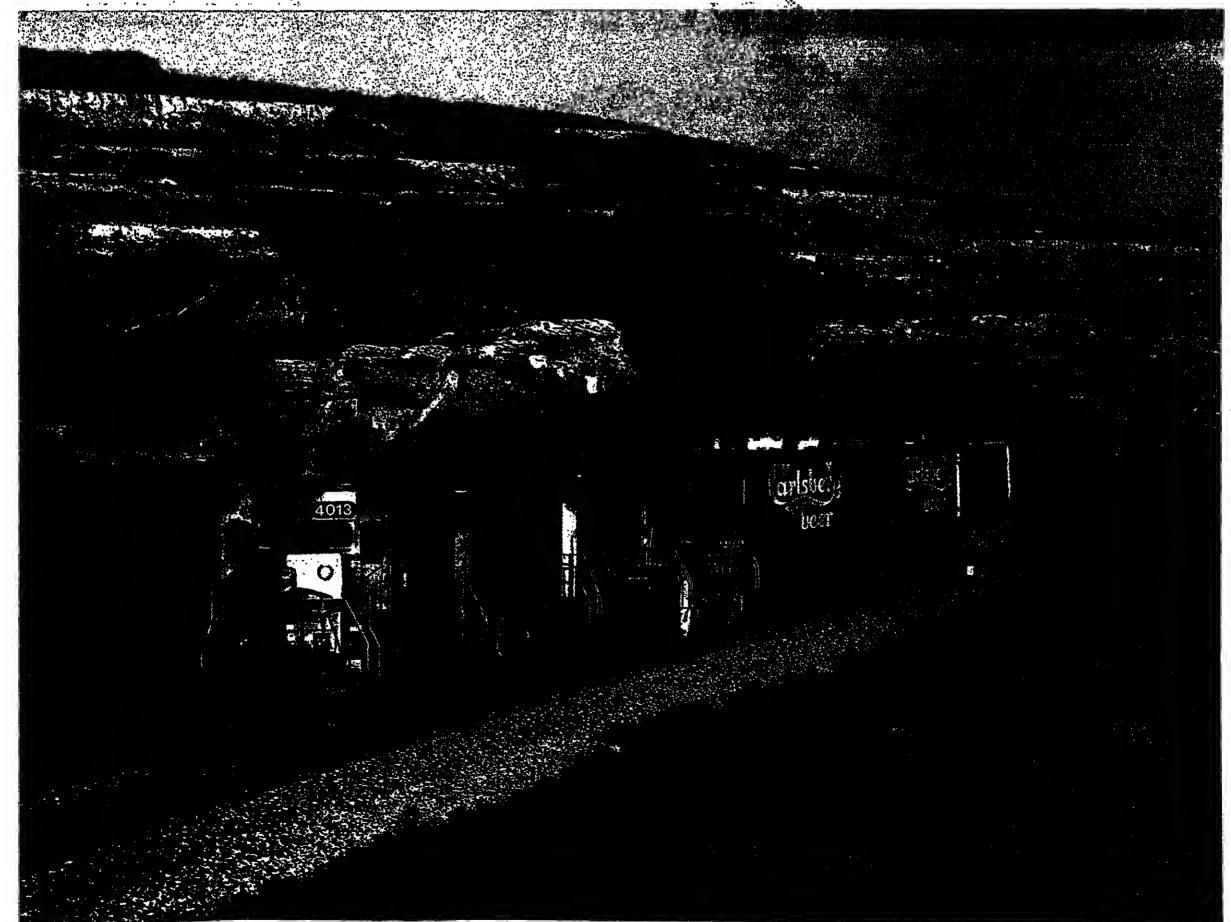

The election commission put turnout at about 80 per cent in the elections praised by foreign poll observers as among the best organised in a region where logistics problems have marred voting in recent elections, often

Nigerians ring up big bills

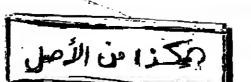

State-run Nigerian Telecommunications (Nitel) was owed N19bn (\$238m) at the end of September - mostly by private customers, it admitted yesterday, Mr Buba Bajoga, Nitel managing director, was quoted by the News Agency of Nigeria saying: "We are poised to recover the money from our debtors because this revenue is needed to improve on the performance of the organisation." Nigeria's telecommunications are notorious for unreliable

Customers often go through a slow and chaotic process to settle their phone bills, while touts tap into lines

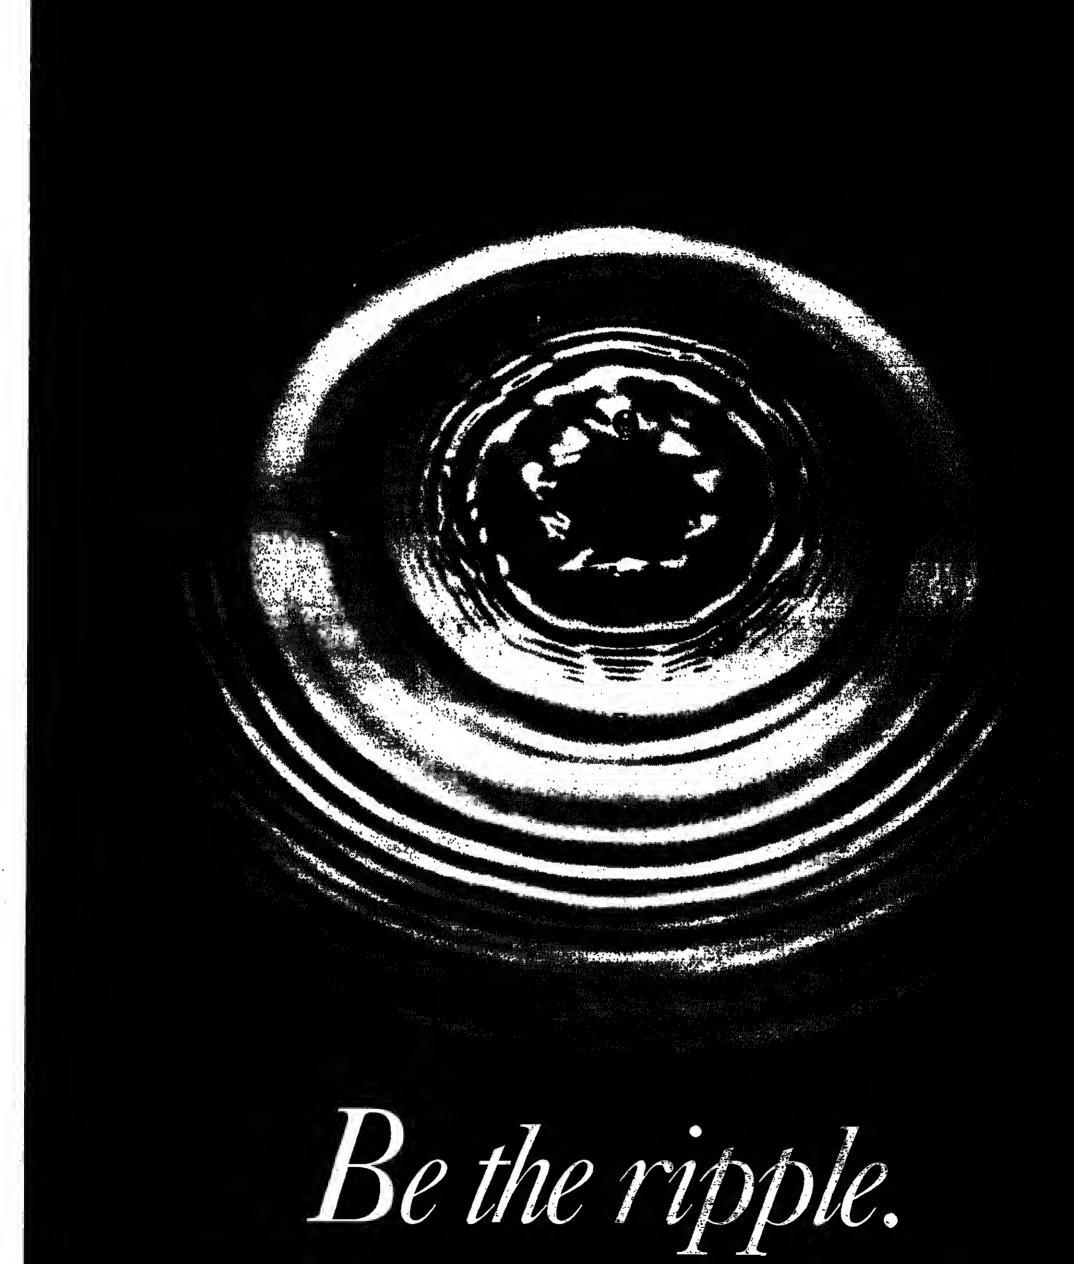

incurring large debts for their owners. But the sector is gradually opening up to private enterprise. Nitel has signed inter-connectivity agreements with five companies and given them provisional licences. although they have yet to start operations. - Reuter. Lagos

Probably the best beer in the world.

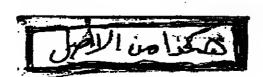

Yesterday Tenneco created more than a few ripples. We're transforming ourselves into a global manufacturing company.

Our December 10 shareowner vote was the culmination of our strategy to create a powerful new Tenneco with two strong businesses — automotive parts and packaging.

Tenneco Automotive is the world's largest supplier of original and replacement parts for ride control and exhaust systems — driven by leading global brands Monroe and Walker.

Tenneco Packaging — with recognized brands like Hefty an OneZip — is one of the world's leading diversified packaging companic focused on value added products in growing markets.

We've spec off several units after building up their strength and value for shareowners. We've paid down \$5.5 billion in debt. We've built a health balance sheet and become a stronger, less cyclical company.

Or be the stone.

And this is just the beginning.

Our plan is to grow share-owner value and increase annual earnings r share at double-digit rares through the business cycle. How? Through emal-growth, impovative products, acquisitions and continued improvement operating performance.

We manage for example and we have by one credo: Action creates opportunities.

Action creates opportunities.

Tung to be named HK chief today

By John Ridding in Hong Kong

Hong Kong will today pass a milestone in its return to Chinese sovereignty with the selection of the territory's first post-colonial governor, widely expected to be Mr Tung Chee-bwa, the shipping tycoon.

Mr Tung. who won a clear majority in a preliminary ballot last month, is set to be chosen by a secret ballot among the 400-members of a Beijing-backed electoral college for the top post after next July's handover. He will soon travel to Beijing with the territory's top civil servant to meet senior Chinese leaders, according to Chinese officials.

The meetings, which are planned within the next few weeks, are designed to demonstrate co-operation between Mr Tung and Mrs Anson Chan, the respected chief secretary. A close relationship between the two is considered important for a successful transfer of sovereignty from Britain to China

Mr Tung bas so far remained guarded about the composition of his executive team. But he has strongly signalled that he would seek to retain Mrs Chan in her present post. He has also indicated be would retain other senior civil servants to assist a smooth transition.

Government officials privately refer to the combination of Mr Tung and Mrs Chan as the "dream team". Mrs Chan is seen as a vigorpromised autonomy and an able administrator, while Mr Tung is well-connected on the mainland and among the territory's husiness commu-

EU scheme for boat people in disarray

Hanoi and Brussels in dispute over control of disbursement

By Jeremy Grant in Hanoi

A European Commission scheme to help the last of the Vietnamese boat people start new lives on their return home is in disarray six months after it began. Diaagreement betwaen Hanoi and Bruseele over

financial control of the programme has delayed disbursement of aid to former only a fraction due to them so far, aid workers, Commisaion representatives and Vietnamese officials say.

The development comes at an awkward time for all parties to the problem, which is economic projects for 48,000 drawing to a close as increasing numbers of Vietnamese return home, mostly

Britain has pledged to empty the camps before China resumes sovereignty over the colony on July 1 next year. This is increasing pressure on the Commission and Vietnam to ensure the boat people are re-integrated into the communities they ahandoned years ago.

The Commission has made

much of its role in this process since it first funded a asylum seekers, receiving re-integration scheme in 1989. Under a similar \$20m tbree-year initiative launched in June known as the Returnee Assistance Prosion is to fund social and returnees who have arrived since July 1994, including some yet to return from

Many should be eligible for loans to set up small businesses, cubsidies for training and education, medical care and funding towards children's schooling. Loan terms have vet to be decided. But of 3,000 returnees targeted for other cate-gories of aid in the first six months of RAP, only about 10 have received assistance.

'Wa're concerned that if we continue lika this, the project might not meet its objectives. We have a moral commitment to the raturnees, and to the taxpayer and European Parliament. The Commission and the Vietnamese have to improve the effectiveness of this project," Mr Riccardo Ravenna, head of the Commission's

The Commission is understood to have two main conlocal staff and financial accountability. Both are linked to which side has real control of RAP. Sources say differences over this issue have delayed delivery of assistance to returnees. "The reality is, returnees are coming back and getting almost nothing," said one. Under RAP's agre

signed in March with the Commission, Vletnam's labour ministry agreed to give preference to recruiting Vietnamese with experience on the previous Brusselsfunded programme, known as ECIP, for positions in RAP. Those workers would be responsible for dishursing sion-appointed financial conaid to returnees in the prov-

inces. But the sources claim the ministry has passed over former ECIP staff in favour of its own personnel, many with no relevant experience. Matters are complicated by the absence of a Commisnamese insistence on appointing a Vietnamese financial controller, in the interests of getting RAP off the ground.

Mr Nguyen Trong Dam. vice-director of the Haiphons labour department, acknowledged delays were occurring in Halphong, homo to about a quarter of all returnees. "We don't know exactly why the programme is delayed but feel it's because of the procedures and policies of the Commission," he said.

Local labour offices were reluctant to hire ECIP staff because co-operation between ECIP staff and local authorities had been poor, be added. "We are now making aure the local labour department recrults new staff so it can have some

Peters joins Bolger in New Zealand coalition

The nationalist New Zealand First (NZF) party last night agreed to form a coalition with the conservative National party, giving New Zealand a government nearly two months after its first genaral election under proportional representation

As part of the coalition agreement the new government is to widen the Reserve Bank's inflation target to a range of 0-3 per cent from 0-2 per cent at present, but New Zealand'e economic policies - which have won the country broad international fiscal policy would be relaxed if government, while Mr Bill Birch political stability.

The National party - wbose leader, Mr Jim Bolger will continue as prime minister - has agreed to defer tax cuts for 12 months from next July, and the new government (US\$845m) increase in spending on health, education and social walfare in the next fiscal

India's jet order highlights a decade of defence neglect

Russian Sukhoi-30 fighter aircraft, its biggest arms purchase in 10 years, will do no more than contribute to a long-delayed modernisation of the coontry's air force and will leave its strategic capacity little changed, according to

The deal breaks a decadelong squeeze in defence spending, which has shrunk military expenditure to 2.6

ndia's \$1.7bn order for 40 per cent of gross domestic product from 3.6 per cent in

Though welcomed by Indian air force commanders, the Sukhoi contract has served to highlight growing expressions of concern from senior military officials over what they claim to be a strategically damaging neglect defence analysts. of defence since the 1980s.

Only last week General Shankar Roychowdhury, army chief of staff, launched a scathing attack on "a decade of inadequate defence planning and finances", tell-

ing a Delhi defence seminar

that "the symptoms are becoming difficult to treat". His remarks echoed those of Admiral Vijay Singh Shekawat, the retiring chief of navy staff, who in September argued that the navy'a failure to purchase any new ships in 10 years had hurt India'e defence prepared-

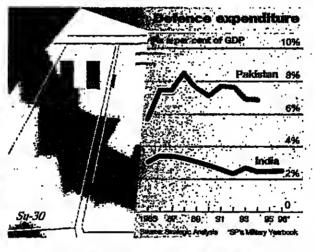

"It takes 100 years to build a navy," he said. "You cannot sit tight for 10 years and then rush about for procure-

The purchase of the 40 advanced SU-30 jets is a "reequipping", says Mr Jasjit Singh, director of the Delhibased Institute for Defence Studies and Analyses. But it will not fill the gaps which

bought to perform an air defence role, supplementing two aquadrons of French Mirage 2000 jets bought in the 1980s. The new Russian fighters are expected to be equipped as multi-role combat aircraft and can be equipped for deep-strike missions, with a maximum unrefuelled combat range of 3.000km and weapons pay-

load of up to 8,000kg. But, according to Mr high fiscal deficit from its Singh, the burden of India's present level of more than 5 air strike capability will continue to rest on much older Russian MiG 27 and British Jaguar jets for perhaps the that defence spending this next 10 years. The backbone of India's air defences will remain the still older MiG budget. But this extra spend-21, which most of tha air force's 37 squadrons consist

which all 40 fighters are tary salaries and higher fuel expected to be in service costs rather than any subwithin three or four years, stantial re-equipping.

will not complete the air force's own wisb-list. This includes an advanced trainer jat, for which negotiations with potential French, Britisb and Russian suppliers have been going on for 10

Elsewbere, the navy has cited the urgent need to replace its two ageing aircraft carriers with at least one new ship, while also pointing out that almost a third of the fleet faces decommissioning by early next century. The army has also been conducting long and so far fruitless negotia-tions with a range of suppliers from Slovakia, Britain, have emerged, he says. Russia and South Africa
The Su-30s have heen a new 155mm howitzer. Russia and South Africa for

The full re-equipment list is longer and, say analysts, unaffordable even if India's defence budget rises - which it is not expected to do over the next several years to about \$10bn a year, from the present \$7.75bn budgeted for 1996-97.

More substantial spending would appear incompatible with the government's aim to bring down its chronically per cent of GDP.

The United Front government has already conceded year will have to rise perhaps Rs15bn (\$420m) abova ing, though it may include a small advance component of the SU-30 cost, is expected to The Su-30 order, under reflect a delayed rise in mili-

Defence analysts point out that to sustain its conventional defences. India has little option but to import increasingly expensive foreign weapons systems. Current indigenous programmes to build its own battle tank and a home-made fighter aircraft, they say, will not be adequate. But, says Mr

Bramha Chellia, a defence expert with the Centre for Policy Research, a Delhi think-tank, "India does not have the resources today, and will not have in five years down the road, to sustain a full conventional defence modernisation." The awkward policy issue for India'a defence planners - and potential source of

grave misgiving among its neighbours, not to mention the US - is that the apparently prohibitive cost of upgrading its conventional defences merely adds to the allure of a cheaper missilebasad and, perhaps, an overtly nuclear defence

India currently bolds a policy of nuclear ambiguity. It tested a "nuclear device" in 1974 and, while discisiming any present intent to develop a deliverable nuclear weapon, neverthelesa claims to have the wherewithall. It has already succeasfully tested both ahort- and long-range nuclear-capable missiles.

"The nuclear and missile deterrent is becoming much more attractive to policy makers," suggests Mr Chel-

US warships 'may use HK'

US warships will still be allowed to use Hong Kong harbour after control of the British colony reverts to China next summer, Gen Chi Haotian, Chinese defence minister, has assured Washington. Gen John Shalikashvili, chief US military commander. yesterday described the Chinese gesture as one of a series of "confidence-building measures" between the two nations A Pentagon spokesman said Gen Chi had stressed: "What China wants in Hong Kong is stability and prosperity...following the terms of the China-UK Declaration on Hong Kong." In that context, it had agreed "in principle" to allow the US fleet to continue to use

Hong Kong harbour. The US general also said US officials had made clear it was "counter-productive" to the stability of the Middle East for China to have sold Iran sea-launched cruise missiles, one reportedly tested by Iran from a Chinese made patrol boat recently. The visit hy Gen Chi has included a White House meeting with President Bill Clinton, in which Mr Clinton did not raise any hilateral Jurek Martin, Washington problems, officials said.

Gowda calls growth talks

Mr H.D. Deve Gowda, India's prime minister, plans to convene an emergency meeting of top industrialists and economists this month to discuss reasons for the country's economic slowdown, he said yesterday. The announcement came as figures showed September's industrial output had almost stagnated, with growth of

just 0.7 per cent on the same month last year. The Centre for Monitoring the Indian Economy, an independent research agency, said growth had slowed from 9.4 per cent in first quarter starting in April to 6 per cent in the second. "Very preliminary" estimates for October put monthly growth alightly up at 1.5 per cent over a year earlier. India's GDP last year grew 6.6 per cent, the second successive year of rises above 6 per cent. Officials say a robust harvest and good monsoon ought to keep growth above 6 per cent this year in spite of the industrial slowdown . Mark Nicholson, New Delhi

Japanese machinery spending

Japanese companies increased spending on machinery, an advance indicator of overall corporate investment, by 44.2 per cent to a record Y1,365bn (\$12bn) from September to October, official data released yesterday showed. The Economic Planning Agency pointed out that the recovery, from a 10.2 per cent decline a month earlier, was partly due to one-off factors, but the underlying upwards trend was strong. The EPA expects orders to rise 19.3 per cent in the three months to December against the third quarter. A separate finance ministry survey of husiness

confidence in November showed 8.8 per cent of top managers thought economic conditions were improving, a modest improvement on 6.5 per cent in August, but below initial forecasts of a confidence rating of just over 10 per

Manila ponders lending limits

The governor of the Philippine central bank yesterday said he was considering policy guidelines setting limits to the level of banks' lending to the property sector. Some analysts have expressed concern about the sustainability of Manila's property boom and about banks' increased exposure to the sector. Last month, the central bank published a study on implications for monetary policy of bank exposure to the property sector, it found prices in three of Manila's business districts had risen by between 150 and 230 per cent since 1994. Justin Marozzi, Manila

lo July this year the Financial Times - in association with a municipal anthority on the south side of the river and the Corporatioo of London, the municipal authority for the City launched a design competition for a pedestrian bridge to link St Paul's cathedral to the oew Tate Gallery of Modern Art and the Globe Theatre, a reconstruction of Shakespeare's original on the south bank.

winner was announced yesterday - a UK mission which can vote team comprising Sir Norman Foster and Partners. the architects, Ove Arup and Partners, the engineers, and the sculptor Sir Anthony Caro. There were 223 entries from around the world and the competition was organdec Royal Institu British Architects and European Union rules.

design is for a cable-sup- to mark the year 2000. ported bridge that needs

280m of the Thames. By day all that will be seen is a line of stainless steel with mini-mal cables; at night it will be literally a controlled

beam of light. At each end of the bridge the sculptor's input will be felt in the ramps and steps he has designed which make it easy for the disabled to reach the hridge. On the south side, the circular ramp is a clear echo of the dome of St Paul's.

The Millennium Bridge will be the first new Thames crossing since Tower Bridge was completed in 1894. While Paris has the Pont des Arts and Venice the Accademia Bridge, this will be the capital's first and only bridge dedicated to pedestrians. It will offer the most spectacular views of London - especially of the whole of St Paul'e from the middle of the river.

It is now the subject of a hid to the Millennium Comfunds for up to 50 per cent of the anticipated final cost of £10m (\$16.4m). The rest of the money is likely to come from private sources and municipal anthorities. The bridge will be the most significant reminder of the mildistinguished team behind it is likely to be completed in The elegant winning good time for any festivities

N Ireland pays price for return to terrorism

By John Murray Brown in Dublin and John Kampmer in London

Northern Ireland paid the price for the resumption of terrorism yesterday as the government announced big cuts in training, education and welfare to fund the increased cost of law and order following the breakdown of the Irish Republican Army ceasefire.

Announcing projected budget cuts for the first time since 1990-91, Sir Patrick Mayhew, Northern Ireland secretary, said the peace dividend had "alas been reversed", with en extra £120m (\$196.8m) allocated to cover policing and compensation payments for the period 1997-2000.

"The IRA and those responsible for the distursummer bear a heavy responsibility," Sir Patrick

He said Northern Ireland "cannot be exempt from contributing to the government's policy of controlling public expenditure", pointing out that per capita public spending was still 30 per cent higher than on the UK mainland.

that the violence which fol-lowed the RUC's climbdown last July, when it allowed Protestants to march past Roman Catholic homes in the village of Drumcree, had led to sharp cost overruns. Ms Marjorie Mowlam, the opposition Labour party's Northern Ireland spokesman, criticised the measures as "a budget for the short

shed 2,000 pubs. Such an amputation would not nec-

essarily undermine the financial logic of Bass's takeover. It is a sellers' market for pubs at the moment so Bass would get a good price. Moreover, it would be likely to retain about 70 per cent of the beer sales through them.

But such an outcome would severely diminish the financial attractions of the takeover for Bass. Unless Bass is more adept in the next stage of negotiations with the government, one analyst said, it will have to decide whether or not to conclude the Carlsherg-Tetley takeover.

Net finds its voice

To most telecoms companies, Internet telephouy is a gimmick to be dismissed or a threat to be quashed. Not to Telecom Finland: the long-distance operator will this week begin offering voice communication over the network. It is linking with VocalTec, an Israeli developer of sound compression and transmission software, to allow PC users to make

Conversations over the Internet are still crackly and complicated to set up, but Internet telephony allows long-distance communications for the cost of local calls and is expected to displace traffic which now travels over the established telephone network. Telecom Finland's move, which will cannibalise existing revenues, marks the first recognition by a mainstream telecoms company of the seriousness of competition from the Internet.

VocalTec, tel US 201 768 9400; fax 201 768 8893; http:// www.vocaltec.com/

Check out bank site

Retail banking over the Internet will become a reality when Microsoft and CheckFree unveil a new product called BankStreet Web. The two companies are already active in providing tools for online banking, but until now the software has been designed for private dial-up networks set up by banks. BankStreet Web will allow consumers to use the

Internet and standard Internet software such as Netscape Navigator rather than installing special software onto their PCs and dialling in to a dedicated telephon number. BankStreet Web will also enable users to access elements of Microsoft's Money 97 personal finance application through their Internet browsers. Banks,

Using the Internet · Wolfgang Münchau

PC that runs Windows or a Power Mecintosb computer, a web browser such as Netscape or Microsoft'e Internet Explorer, and the VDOLive software, which can be downloaded at the site (or directly at http://www.vdo.net/download) free of charge.

Occasionally the picture lags behind the sound, but the quality on the whole is adequate enough for a newscast - which usually consists of the presenter's introduction followed by a short news

The FT's review of Information Technology appears on the first Wednesday of each month

The idea for using the Internet to transmit the programme - rather than merely providing some extra information - was the brainchild of Robert Amlung, a computerliterate television reporter at ARD.

With the help of a some part-time students, virtually no budget and no interference from the editorial board, he acquired a relatively modest set of hardware, chose an ISP and started what turned into one of the few genuinely useful information services on the Net - at least for German speakers - available on http:// www.tagesschau.de.

The two main programmes trans-mitted are Tagesschau, Germany's most-watched news programme, which is broadcast from Hamburg at 8pm every day, as well as Tagesthemen, a current affairs programme, running usually at 10.30pm. At the moment, the Internet version of the evening news arrives after a delay of about 45 minutes, although this varies from day to day. During the August CeBit com-

puter fair In Hanover, the ARD Internet team experimented with live transmissions. But Amlung

says live transmissions are not the

main goal, since few people would

chose to watch a programme live on the Net, when they could watch

it live on TV. One of the main target markets are. German speakers who live overseas, especially in the US where the internet is the only live link with home, and certainly the only way to watch German news. This is bow it works: every

part-time helpers tape the show on to the hard disk of a computer. Using video software, the programme is broken down into chunks, which are fed into the Web

When the service was launched in the summer, the Web site collapsed under the weight of 300,000 hits, the number of times a Web site is accessed. Given that most users access a site several times are using the Internet. The first when they browse through the article, on investment onnlysis. pages, this translates into roughly appeared on November 20.

Today, there are about 7,000 to 10,000 users watching the internet news every night. Judging by the e-mail messages, a large number of users are from the US. There are also some German residents who do not make it home for the som news programme, but who prefer the concise quality of public broadcasting compared to what the private sector offers.

vate sector offers.

At present, the service can be transmitted to only 50 people simultaneously, a rate which can be increased to 200 without much difficulty if the need arises. For watchable results, the throughput needs to be 1,500 to 1,700 bytes per coord which is roughly the score second, which is roughly the scope of a 14.4kbps modem, although a 28.8kbps modem is recommended.

"The bottleneck is not the com-puter or the modem," says Amlung "but the service provider. We have problems especially with some of the smaller providers.

A fully-digitalised TV news service bas potentially far-reaching editorial implications. For example, the Internet service gives viewers the choice to make selective decisions, such as deciding to cut out the lead story on on Zairean refugees and go straight to football and the weather.

Viewers can also choose their own running order, a decision which in traditional television is the exclusive prerogative of journalists and editors.

Internet television brings up a variety of potential problems, such as data protection, since there is little anonymity on the Net.

But the most important aspect. says Deppendorf, is that "for the first time, people can watch us anywhere in the world," whereas previously the scope of a transmission was limited by the reach of a transmitter or the footprint of a satel-

The next big project for ARD's Internet service will come in September next year, when Amlung night, Amlung and his team of and his team plan to broadcast the Hamburg state elections, complete with exit polls, current projections and all the usual numbercrunching that comes with elections. By then, they hope, the Internet will have become just another normal way to watch the news - or rather, parts of it.

A nine day journey through Jordan with Gerald Cadogan 9-17 May 1997

The Financial Times, together with Bales Tours, invites you on a special journey through Jordan with FT writer and archaeologist, Gerald Cadogan. The trip will explore the historical aspects of the country, together with its modern identity as an independent Arab state.

Based on stays in Amman and Petra, the journey's highlights will include:

- The great Roman city of Jerash
- The Byzantine and early Islamic desert castles The Dead Sea and its eastern
- mountains · The mysterious rose-red city of
- The spectacular rock formations of Wadi Rum

To find out more about this fascinating trip, simply complete the coupon opposite or telephone Richard Thomson on 0171 873-3670 during normal office hours.

Day 1 Depart Heathrow for Amman for four nights Day 2 Amman and the Dead Sea

Day 3 The ancient cities of Jerash and Umm Qais, Pella in the Jordan Valley and castle of Ajlun Day 4 Early Islamic and Byzantine desert castles

Day 5 King's Highway to Mount Nebo and Madaba Crusaders' castle at Kerak; then Petra for four nights Day 6 Early morning visit to Petra Day 7 Return to Petra then on to Wadi Rum

Day 8 Beidha, one of the oldest Middle Eastern sites Day 9 Drive to Amman and fly to Heathrow Price: £1,350 per person (Single Room Supplement £210)

the UK who does not wish to travel via Heathrow. Price Includes: Flights, half bourd at 5 star hotels plus lunches on days 3, 4 and 5; All transfers, taxes and tipe; Excursions and events stated in the litnerary, and the services of a specialist guide in Jordan. Price excludes: Insurança, visas, itams of e parsonal nature. This tour is organised on behalf of the Financial Times by Bules Tours.

BUSINESS SOFTWARE Sifting data for minerals mining

Rich seam for neural systems

"thinking" computer system using neural **L** computing techniques which mimic the workings of the brain has been developed to find mineral deposits.

The software tool, Prospect Explorer, can analyse a wide range of raw exploration data and automatically detect and prioritise anomalies which could indicate new deposits It has been developed by

Neural Technologies, a small nine-year-old UK-based company, working with Straits Resources, a quoted Australian mining

According to Alfred Weiss, executive director of the American Institute of Mining, the software tool will bring about "the biggest revolution in the mining industry for 25 years". Prospect Explorer is being marketed by Neural Mining Solutions, a joint venture between the UK

and Australian companies The excitement reflects

confronting mining companies and geologists Gavin Daneel, exploration manager of Straits Resources, says the 3,000 mining companies around the world collectively invest more than \$2bn (£1.2bn) a year on exploration. Until recent times,

explorers have often been able to make discoveries of new mineral deposits by direct means, but undiscovered outcrop deposits are now rare. Now geologists must rely on more indirect sampling methods such as ground, air and space-borne geophysics and other remote sensing methods.

However, as collection tools became more sophisticated, the volum data generated from surveys has exploded. Even for expert geologists. sifting masses of exploration data to identify mining prospects is tedious, time-consuming and costly. The initial step in

Network problems

securing a new site is to the scale of the problem "peg" an area of land for which mining companies pay a charge to the government. Geologists have a fixed time to decide wbether it should be developed or returned.

Time and accuracy are of the essence," says Daneel. Geologists need to move quickly to collect and analyse data from a range of different surveys before they can identify drilling targets. With the industry's increasing dependence on remote sensing methods, the amount of data being generated is reaching astronomical proportions.

The process of analysing data from a 300sq mile plot can easily tie up a team of geologists for six months and cost more than \$100,000. Typically, the team will pore over at least six sets of surface survey data covering airborne geophysics, topography, gravity, ground geophysics and geochemistry information. These sets of data are plotted and

examined on a light-table. Even conventional computers are unable to

display simultaneously all the data for interpretation and so-called expert systems rely heavily on subjective opinion.

"A different approach was needed to solve these complex problems." savs Nick Ryman-Tubb, chief executive of Neural Technologies.

Prospect Explorer runs on an ordinary personal computer and can quickly highlight areas of potential interest. The geologists use interrogation techniques and search-facilities to look deeper for detailed information to analyse.

Using Prospect Explorer is up to 50 times faster than manual methods for analysing survey data, says Ryman-Tubb

"Straits Resources is one of the first mining companies in the world to adopt neural computing technology In an effort to improve efficiency and

reduce costs," says Brian Rear, Straits' chief

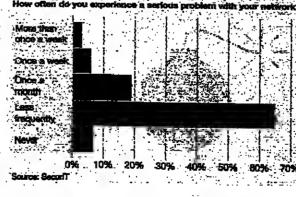

IT in action

Families and their PCs

Personal computera are altering how families Interact with each other, with far-reaching and often positive results. This is among the main findings of a survey of 1,000 PC-owning US households, conducted by Roper Starch Worldwide for Lexmark International, the US printer manufacturer. Nearly three-quarters of

parents agreed that using a PC had helped their children become more creative, and 48 per cent said their children would not have done so well at school if they did not own a PC. Some 42 per cent of parents also reported that their children now watched less television.

Keeping in touch with family and friends was one of the most frequently meotioned uses for bome PCs. Some 63 per cent of respondents with Internet connections agreed they were better able to stay in contact. Lexmark Report on Com-

puting and the American Family. Contact: John Shotwell, tel US 606 232 7652

Systems need support

Corporate computer networks run an increasing number of "mission critical" applications, but a survey by SecuriT. Securicor's computer services company, has highlighted several problem areas. Initial findings from

the annual study of UK companies reveal that nearly 10 per cent of the 800 respondents experienced serious network problems once a week. A further 19 per cent suffered similar problems at

least once a month The problems are occuring in spite of nearly two-thirds of the organisations which took part having dedicated network support staff.

FINANCIAL TIMES WEDNESDAY DECEMBER 11 1996

Television/Christopher Dunkley Warhol said tbat we would

The do-it-yourself revolution

ARTS

all be famous for 15 minutes? But he, of course, the dear old-fashioned thing, was speaking before the invention of the Internet or digital television, and when cable and satellite were scarcely gleams in their inventors' eyes. If the expansion of the electronic mass media continues at its present rate then the day cannot be far away when each of us will have to be famous for a lot longer than that just in order to fill the available space/ tima. Already in terrestrial television (even though the trashy wastelands of the new technologies are making terrestrial broadcasting look increasingly like the conture end of the business) more and more "ordinary" people are featuring in "personal

point of view" programmes. One of the reasons for this is another television advance, not in the transmission but in the production process. The days of the seven-strong film crew have gone, and footage of broadcast quality is now routinely shot on video cameras with huilt-in sound systems, operated by one person. For two years the cable station Channel One has been training "VJs", video journalists, one-man hands, many of them seem on the whole to be even does not care what the viewing power of this sort of television, doubt about King's personality. female, who tota tha cam- tougher on their subjects than public think. The point is that era/sound system around with the conventional sort. That is them, set it running on a tripod, not to say that conventional and nip round the front to do the presentation and interviewing. Even more significant, perhaps, is the development of Video recently in The T Notion and Video Diaries on Maxwell on BBC1).

try, the second supplying full length programmes shot by nonprofessionals on modern lightweight equipment lent by the You might expect that one effect of the do-it-yourself revo-Intion would be to produce more indulgent and flattering proes, yet that does not seem to be happening at all; rather the reverse. Perhaps It is simply the effect of the modern craze for the warts-and-all portrait, as typified by the Secret Lives series on Channel 4 which this week de-

BBC2, the first providing one-

minute inserts for the network

about the lives and attitudes of

scores of people around the coun-

methods can only produce panegyrics (though there was an unforgettable example of this recently in The Trial Of Kevin

nybody who watched the recent episode of Channel 4's Women At Play series about someone called Jibby Beane will have seen how ruthless professional producers can be, and will surely have wondered whether the woman had any idea how shallow and ridiculone she would look. Since she came across as an art and fashion luvvie of the most superficial sort, tottering around on Vivienne Westwood platforms. screaming with false sounding laughter and shricking "Darling!" at anything that moved, it may be that, for her, exposure is mythologised Douglas Bader, but all - her 30 minutes of fame is antobiographical programmes all that matters - and she simply

this was an example of conventional programme making (producer and director both female, incidentally).

So too were the programm Modern Times and Enterprise Culture Revisited which were shown consecutively on BBC2 last Wednesday. Each dealt with a man who had surfed the crest of the Thatcher wave and now found himself washed up on the beach with the tide going out. Keith Sinclair used to make horse hoxes and, by his own reckoning, was outstandingly

One of the difficulties with this sort of programme is that the viewer has no way of estimating the soundness of that kind of claim. Yet some may have concluded, after noting Sinclair's temper, resentment, and readiness to believe endless fairystories about a cheque haing in the post, that this was not a man in whose business they would rush to invest. Such is the to co-operate. You were left in no

portrait.

The following programme was almost as strong even though the subject, Ken King, had chosen not to participate. Last week's programme carried on the story from a 1989 programme (in which King did co-operate) explaining how he tried to turn Avebury Manor into a Tudor theme park without ensuring that he first had all the necessary planning permission. Tha up-dating showed how a combination of middle class opposition and red tape had scuppered King and simultaneously dashed the hopes of the village's working class for jobs in the theme park. The subtleties and ironies in the class war - rough diamond King welcomed visits from the workers of the village as no previous lord of the manor had - were among the strongest aspects of the programme. What was most remarkable, however, was that it hardly seemed to be weakened by the refusal of its main subject

On the other hand there was considerable doubt about the character of C.M. Hardt, tha woman responsible for this week's Travels With My Camera on Channel 4 on Sunday, even though she made her own programme. She told us she came from New York, of a Spanish immigrant family, and we gathered that, as a member of the Oprah Winfrey generation, she believes not only in letting it all hang out, hat in pulling ont everyone else's as well. This was particularly true of the mystery surrounding her grandfather's death in El Valle, Spain, in 1948. Having sub-let her flat and hought a camera, she went to Rl Valle and started asking questions, establishing fairly easily that her grandfather had been shot by the police. The question was: who betrayed him?

The programme's real fascination came from the slow realisation that C.M. Hardt was a hit of a blundering ninny, and was telling us so. Her amazing 97-yearold great grandmother just kept repeating "How should I know?" in response to all questions and went to her grave during the course of the filming without giving anything away. Other memhers of the grandfather's generation spoke to the camera as people generally seem to

feel obliged to do these days though without revealing anything. It fall to an uncle, who had grown increasingly impatient with the making of the programme, to point out that his generation did not want these old wounds re-opened because, if that happened, they might feel obliged to go and take revenge for that 50-year-old betrayal.

Suddenly you saw how this New York sprig of a Spanish family was stomping her great 1990s boots all over a fragile and delicately preserved system of social and ethical checks and balances which had existed in that hill village for generations. You may be able to go back, but if emigration has deprived you of the code then, however much you may be tolerated and even welcomed, you will not entirely fit in. And who was telling us this? The subject herself. Wa can hardly expect every 15 - well, 60 - minutes of fame to be as revelatory as this, hnt we must expect more of it.

he latest ballet programme at the Palals Garnier might really be called "Balanchine refreshed". Its matter is four of those masterworks in which Balanchine responded to Stravinsky – an affinity, I think one must call it, without rival in our century'a artistic history.

Apollo was its starting point in 1928, and in this score Balanchine, most musical of choreographers. found his creative future. The masterpieces made for New York City Ballet from 1948 onwards, culminating in the outpouring of ballets for the 1972 Stravinsky festival, are its great summation. The works that came between are varied and, quite simply, stunning to eye and beart and mind. They are also now part of the lingua franca of ballet world-wide. The trouble with sucb popularity, and with the inevitable reverence felt by dancers and audiences toward such creations, is that they become too sacred for their own good. Their life becomes frozen in care and concern for the text. Their impulse (and they have a motor energy that is always exhilarating) is endangered hout text or "style". Scrupulously done. they can look unlived-in.

How good then to report that in this latest programme, the dancers of the Paris Opera Ballet do not seem over-awed. They dance Balanchine because, clearly, they love what they dance, but they also seem intrigued by what they find. They are delighted by his wit, are eager to show us the varied facets of what they dance. In a programme ocmprising Apollo, Agon, Capriccio and Violin Concerto, casts looked alert and on spanking form. They also looked as if they were happy to show off - in the nicest sense of the word - revealing their own gifts as they revealed Balan-

chine's gifts of choreography to them. Apollo started the evening. and I was worried. For inex-- conducting throughout the rest of the evening with the early arahesque seemed to right rhythmic tautness decided to show a link nal The other muses - Clo-

Flawless: Elisabeth Platel and Charles Jude in 'Apollo'

Balanchine refreshed

hetween Stravinsky and Massenet. For the opening bars, there was not a pulse to be discerned, and anaemic sweetness and charm were abundantly on offer. Charles Jude, a superlative Apollo, triumphed nonetheless, but it was not until the Muses had entered upon their solos that the score became itself. Jude radiated authority and a divine innocence. Elisabeth Platel's Terpsichore appeared to him as the very spirit of classic order and plicable reasons, Vello Pahn grace. Her dancing was, like his, impossible to fault an

Agon was nearly, if not quite, taut enough (Fanny Gaida and Jose Martinez very fine in the duct), but Capriccio had a zip and a brilliance that matched the bright glow of its ruby costumes. Isabelle Guérin and Agnes Letestu were the leading women - uncompromisingly and stunningly in comhang in the air, perfect, eterof their dances - and Man- score). It is a work which

their solos (never has failure interpreter of the male role seemed more fascinating as (and these include Baryshnithey fudged their chances of kov and Edward Villella) heing Apollo's handmaid- showed how he can be witens), and the ballet ended, as tier, punchier, faster and it should, like a sunburst. more street-wise than the rest. Blazingly good.

Theatre/Ian Shuttleworth

Arabian Nights meet Star Wars effect of power, the conflict

Ayckhourn openly acknowledges the deht which his family Christmas show owes to George Lucas. The Champion of Paribanou is equal parts Arabian Nights and Star Wars: Grand Viziers and flying carpets on the one band, mysterious beings with glowing eyes and comically malfunctioning androids on the other. In fact, the robot character Salim more or less sweeps the Lucasian board: he looks like Darth Vader, but McGuinness), the sultan's behaves somewhere between R2D2 and Chewbacca the wookie (and, for added bonus SF value, talks like a Dalek). Just about the only ingredient missing is that fights are conducted with good old fashioned swords rather than lightsabres.

However, since the story of Star Wars is faithful to the same tropes as all great tales, it should come as no surprise that in two hours

between personal feelings and higher duties and the victory of the determined young underdog, as well as a little byplay involving gender roles and the importance of believing in oneself. Nor does Ayckhourn sby away from the more shadowy aspects of tales of yore.

much away, the story deals with the thwarted love Ahmed youngest son, and his childhood sweetheart Murganah (Pauline Turner), and with Ahmed's quest to rid the land in general and his bousehold in particular of an ancient evil now reawakened.

times shows a slightly awkward Disneyfication: performances seem to owe more to animation than to theatre. as with Adrian McLoughlin's Vizier or Kate Farrah's bland Paribanou, a character who has little function other than to provide a cause in which Ahmed can he enlisted. More than counterbalancing this, however, is a sprightly staging with fine smoke-laden special effects and a lethally excessive use of the Stephen Joseph's system of stage trucks.

The script also demonot to give too strates a sharp acuity in inserting just enough gags tailored for the grown-ups. (Jonathan The school parties grew restive only during a couple of lengthy speeches, Ahmed and Murganah's early kiss was greeted by only a single young "Yeuk", and such chatter as there was consisted largely of engrossed second-guessing of what might be about to happen -Ayckbourn's direction at all of which amounts to a seal of young approval.

At Stephen Joseph Theatre, Scarborough, until January we cover the corrupting habitually bustling Grand 4 (01723-370541); times vary.

A lonely, love-hate relationship

away from tinsel and glitter you could do far worse than spend it in the curmudgeonly company of Truman Capote. I say Truman Capote; of course, the man who appears on stage in The Truman Capote Talk Show is in fact Boh Kingdom playing Truman Capote - but his impersonation is so convincing that before long you really believe that the gossipy old novelist is addressing you from beyond the grave.

Kingdom's skill is remarkable: he has a Sonthern drawl, the reptilian eye and the searching tongue all perfected; and from the moment he makes his entrance, one purple-sockedshiny-shoe peeping out from behind the curtain, he has the audience spellbound. Kingdom's script gives us a fascinating and contradictory picture of the writer: he the isolation of the artist appears pitiable and admira- and the relationship

vain and self-knowing in equal measure.

But while Kingdom darts Capote's life, from his lonely childhood through his rise to fame and his descent into depravity, he also touches on other themes. The piece is resplendent with witti-Capote gloats as he recalls throwing the biggest ball New York society had ever seen and "forgetting" to invite Dorothy Parker, and erimaces as he remembers the Alahama relatives "whose sole purpose in life was to let It pass them by". serious slde. In charting

But it also has a more Capote's love-hate relationship with society, Kingdom reflects on the shallow nature of fame and popularity. And, in baring Capote's core loneliness, he dwells on

If yon want an evening ble, charming and repellent, between creativity and selfdestructiveness.

> This is clearly a subject that fascinates Kingdom hack and forth through the show is presented in repertoire with his other hit monologue, Dylan Thomas; Return Journey. And Kingdom includes mischievous cross references between the two: Capote tells us that the hotel opposite his apartment where he once stayed, having been too drunk to get across the road, was the establishment that had also forcibly ejected Dylan Thomas for being "too interesting for his own good". If Bob Kingdom intends to pursue his career with more solo shows about hadly behaved writers, he should have no shortage of mate-

Eternal warm-up

Differences between the main participants at the Dublin summit will delay the reform of the European Union

In the old days, in the sheet music of popular songs, you would often find the piano was given a couple of bars of warm-up introduction to prepare the audience and the singer. Rum-tum-tumtum, Rum-tiddly-um-tum, Rum-tum-tum-tum, Rumtiddly-um-tum, and so on. It tended to be simple stuff which could be kept going indefinitely. And at

the start of the score, you would usually find the magic words: "Till Ready". "Till Ready": these are the words which should be inscribed at the top of the agenda of Friday's European summit in Dublin. The Dublin summit is supposed to be a landmark

session in the intergovernmental conference (IGC) negotiations for reforming the European Union. The Irish hold the presidency of the European Union and Mr John Bruton, the Irisb prime minister who is thus in charge of this phase of the negotiations, has circulated a long list of proposals which he hopes will concentrate the minds of the negotiators. The German chancellor and the French will lead directly to a fundapresident this week held mental debate over the their usual hilateral presummit meeting to coordinats their views and circulate a long text of their own. The stage should be set for a big diplomatic

Unfortunately, there is an air of unreality about these diplomatic warm-ups, because everybody knows nothing much is likely to happen in Dublin. There is still far too little meeting of minds hetween the main participants over what this summit is for and what it is meant to achieve. And the UK government remains at odds with most of the others over anything to do with the EU.

Ostensibly, the main declared purpose of the intergovernmental conference is to make changes to

all 10 applicants for membership from eastern Europe. This must mean a radical streamlining of EU institutions if a Union of 27 states, encompassing a vast diversity of economic and political development, is not to be paralysed by weight of numbers and conflicts of Most of the member states

believe the minimum institutional reform needed to make a mega-Union work would be more and easier majority voting in the Council of Ministers. But negotiations on the majority voting issue will rapidly turn into an argument over the relative voting weights of member states.

The small members have far more voting weight in relation to their population than the hig member states. Since most of the east European candidates are small, this small-country premium will have to he revised before the Union is further enlarged.

But the technical argument over voting weights nature of the relationship between member states and the Union. In short, the debate over majority voting will turn, io two quick

which would make it possi- strides, into a debate over ity clause". France, Gerble for the Union to take in whether Europe needs more or less federalism. It should be both exciting

and instructive; for we shall learn whether the member states are really prepared for enlargement into eastern Europe. But we shall not learn this at the Dublin summit, hecause the Irish have decided to leave the majority-voting issue off the agenda. Why? Because John Major, the UK prime minister, has made clear he will opposs any significant

In fact, Mr Major's government opposes virtually all the reforms advocated in the intergovernmental conference hy the other member states. But since majority voting is judged by the Irish government to be the most controversial and difficult issue on the agenda, it will be among the last to be

increase in majority voting.

The Irish have decided to hand this explosive issue on to the Dutch who will be managing the negotiations during the first half of next year. It will thus be on the agenda for the Amsterdam summit in June which member states have set as the date for winding up the

Similarly with the other big constitutional issue, the idea of a so-called "flexibil-

the constitution of the EU All smiles: hut will Major and Bruton agree in Dublin?

The state of the s

many and other members have proposed that if an inner group of countries wants to integrate more closely than the rest, they ought to be allowed to do so. But Mr Major has

rejected this kind of flexibility; so this issue is also being held off the Dublin agenda, to be handed on to the Dutch. There is thus only one really solid issue on the intergovernmental conference agenda that will face

the summit: the proposal that the EU should extend its scope to cover visa immigration and asylum policy. Bot this, too, is totally rejected by the UK despite support from most other member states. One can see why the French foreign minister has complained that not enough is being done to push the IGC agenda along.

No doubt the Irish have their own reasons for not wanting to isolate Mr Major too spectacularly at the summit - not least the importance of the relationship between London and Dublin in bringing peace to Northern Ireland.

But it is not clear whether postponement of the most difficult issues will improve the chances of a satisfactory conclusion to the intergovernmental conference or make it more difficult. The UK government has virtually no leeway in parliament to negotiate over the issues and reach compromises with the other member states.

If the Dutch followed the Irish logic, the intergovernmental conference would go on bold until the end of May, after the election of a new British government. That would mean another five months of "Rum-tumtum-tum, Rum-tiddly-umtum, Rum-tum-tum-tum, Rum-tiddly-um-tum" - with no guarantee that anyone in the UK will be Ready even

No secret drinking at Christmas

From Mr Frank Haigh. Sir, Lucy Kellaway's item in her column The corporate spirit of Christmas* (December 9) took me back 30 years or more. I was then employed by a Canadian government agency engaged in classified projects. Each year, the chief circulated a letter with the usual Christ-

paragraphs read: "I take this opportunity to remind all staff that the consumption of alcoholic beverages on federal government premises is not permitted. "Please do not dispose of empty bottles in Secret

mas greetings. The last two

Waste burn bags." On another matter, I find it droll indeed that Bill Hall, former editor of the have had the pleasure of meeting, became William Hall once he started submitting from Zurich.

Frank Haigh, 19 West Park Drive, Ottawa, Ont, K1B 3G6, Canada

Caught on copyright

From Mr Anthony Rentoul Sir, In Edward Whitehouse's transcript of a simnlated question and answer session ("Copyright and the Internet" December 9), he rightly tells his interlocutor that, yes, it is a breach of copyright to photocopy cuttings from the FT to show colleagues and customers; and he adds that the infringer "could be hearing from the FT's syndication depart-

In fact, the tortfeasor is more likely to be hearing from the Newspaper Licensing Agency, the collecting society set up to issue licences, on behalf of nearly all national newspapers, to legitimise photocopying or, if needs be, enforce the publishers' copyrights. We take a more sympathetic line towards those who approach us for a licence than against miscreants caught in flagrante delicto.

Anthony Rentoul, chief executive, Newspaper Licensing Agency, 17 Lyons Crescent, Tonbridge, Kent TN9 LEX, UK

'One-size' monetary policy not likely to fit all economies in EU

From Ms Ruth Lea. Sir, I read with amazement the Lex column entitled "Rushed money" (December 9) in which the author seemed to be grossly underestimating the potential damage to the UK economy of, in his words, the "onesize-fits-all" monetary policy. This is mainly because one size is highly unlikely to fit all. The size that may fit Continental economies is

unlikely to fit the British. As we all know, one of the main implications of Emn is that the UK will no longer be setting its own short-term interest rates according to its own economic requirements. Instead we will have the European Central Bank setting rates for the whole of the Emm bloc. So far. so good if we can be sure the rate for the whole Emn bloc will be "reasonably" appropriate

for the individual national economies within the bloc. Alas, a single rate that is likely to be "reasonably" appropriate for the economies of continental Europe (though some commentators suggest that there isn't one) is highly unlikely to be appropriate for the UK. Not only does the British business cycle lead the European cycle, but also the British economy is much more sensitive to short-term rates than our Continental part-

ners. And if the wrong rate is imposed then the macroeconomic stability of the British economy would, of course, be seriously threatened. If rates were too high then we would be stuck in recession; if rates were too low then we would suffer from overheating and inflation. Neither of these options is a suitable background for

Now I am aware that Lex implies that the solution to such problems is a sufficiently flexible labour market and that Britain may even have such a market. Far be it from me to decry the functioning of our labour markets, but this seems to be stretching belief too far, For example, our labour market flexibility could not prevent the continuing pain of recession in the first nine months of 1992 when we were still in the ERM (prior to the blessed relief of Black Wednesday"), and there is no reason to believe that it could if we were sufRuth Lea. head of the policy unit. fering recession in Emu.

Governments hinder wealth creation

From Mr Douglas C. Prewer. Sir. I am amazed at your comment in your editorial "In proportion" (December 10), that "the striking aspect ... is ... how little the

absence of government has mathered". I have always felt that governments do nothing hut hinder, to a greater or lesser degree, the efforts of the individual to make money

through trade. I will single out just two recent instances from so

many over the last 150 years of how government dampened wealth creation - the 48-hour working week directive from Brussels, together with the minimum

wage.
The latest OECD report in November simply said: They bit joh and therefore wealth creation, and should be avoided."

Margaret Thatcher recognised the intrinsic fault lines, and the resulting detrimental impact on British

business, of a centrallycontrolled European bureaucratic empire so beloved by Edward Heath. I am heartened to see that

at least one wealthy businessman has put his earned wealth on the line to try and secure our children's standard of living.

Donglas C. Prewer. 1C Seebird Lane. Beach Village, Discovery Bay, Hong Kong

UK not threatened by cost of EU pensions

From Mr Brendan Donnelly

MEP. Sir, Toby Eckersley (Letters, December 10) fears that imprudent member states within Emn may coerce the UK into assuming their unfunded pension liabilities "by the relevant qualified majority vote".

This fear is misplaced. Article 104b of the treaty, which provides that "the Community shall not be liable for or assume the commitments of central governments", can only be changed unanimous vote. It is difficult to imagine any British government's acceptance of

such a change. Nor would the UK te alone in its unwillingness to sbandon the "no bail-out" clause Government expenditure is a

seamless web, going well beyond pensions. I detect no enthusiasm, for instance, in France to subsidise Greek defence spending; or in Germany to finance the Italian health service.

Article 104b reflects, and will continue to reflect for any foreseeable future, the economic and political reality of national budgetmaking under Emu.

There is no threat wbatsoever from Europe to the long and prosperous retirement that we all wish Mr Ecker-

Brendan Donnelly MEP for Sussex South & Crawley, 72 High Street, Brighton BNZ 1RP,

Referendum reasonable

From Mr Roger Billis. Sir, Your editorial "Silly question" (November 29) derided Sir James Goldsmith's proposed question for a referendum on Europe.

In fact, the question posed by Sir James is similar to the remarks of Mr Jacques Santer on the "moment of truth" on Europe.

The latter said: "What is the point of Europe? Is It the political project we all [sic] joined from the word go or is it a vast free trade area?"

What could be more rea sonable than a referendum on this fundamental choice?

Roger Billis, 5 Maxwell Road London SW6 2HT,

Tiger on the Baltic

There was not much to distinguish Narva from Ivangorod until a border post went np. As the Soviet Union collapsed in 1991, Ivangorod became Russian and Narva Estonian. Then the adjoining towns' fortunes diverged.

Smart-looking banks, colourful shops and even a tourist information centre now grace Narva's streets. Ivangorod offers a primitive open-air market and a single musty office of Sberbank the Russian savings bank. Narva residents, virtually all ethnic Russians, earn on average twice as much than their kin over the bridge in

"Ivangorod is a sad place, but my friends in Narva never complain any more, says Ms Elena Smirnova, an unemployed teacher, speak-ing outside her crumbling house in Ivangorod. "Their quality of life is much

The contrast illustrates the post-Soviet economic story. Estonia's sharp turn to free-market policies hrought prosperity far more quickly than Russia's chaotic efforts to reform.

The northern Baltic country has been guided by the principle of purging nearly every legacy of Soviet rule. "Estonians have this great inferiority complex," says Mr Joakim Helenius, chairman of Hansa Invest, a small investment bank in the capital Tallinn. "They desper- Narva show how ately want to catch up." And catching up they are. much Estonia's

Expanding tourism, banking and trade have fuelled three years of economic growth. For now, the growth is a depend on the modest 3 per cent a year but Mr David Hale, chief economist at Zurich Kemper Investments in Chicago, who next door visited the country recently, believes the official statistics do not take adequate

Estonia has visions of becoming a mini-Hong Kong, reports Matthew Kaminski

growing service sector. Some Estonians are already predicting their country will be the first post-Soviet "tiger" economy, and Mr Hale sees it as a future "mini-Hong Kong" - a small liberal entrepot on the borders of a giant Russia.

Signs of prosperity are everywbsre. Small bustnesses and a middle class are thriving in Tallinn, a ousy Baltic sea port.

Estonia embraced radical economic policies from the start. Six months after the Soviet Union collapsed, the kroon, controlled by a currency board and backed up by hard currency reserves, replaced the rouble. It has een fixed against the D-Mark for four years.

Import duties were abolished. Numerous Soviet-era regulations disappeared. Foreiguers were permitted to buy land. A flat 26 per cent personal income tax was introduced. A bankruptcy law was quickly put in place.

The long queues of lorries at the border in 1.5m people 150m Russians

account of Estonia's fast. Corruption is not a severe problem and investors appreciate the stoical dedication of the Estonians to work and efficiency. Foreign investment flows into Estonia are eight times bigher per capita than into Russia. In eastern Europe only Hungary and the Czech Republic have

done better. A bold privatisation programme is under way. Although local capital is scarce, there is little hostility to foreign ownership of Estonian assets. Threequarters of state-owned companies have already heen sold and the electricity, gas and telephone companies, as well as the port and the railway network, are expected to be sold by tender to for-

eign buyers next year. The banking sector, a problem elsewhere in the region, was straightened out early. Estonia's banking sector is "the most impressive in central Europe", says Nomura, the Japanese investment bank, in a recent report. Estonia took a Darwinian approach. When eight large hanks got into trouble in 1992, the young ministers in government ignored them and allowed them to collapse. New pri-

vate banks took their place. "We were very cruel," recalls Mr Siim Kallas, who ran the central bank at the time. "But after that, everyone knew the state would not save them. So clients follow what's going on and bank managers know they are responsible for stability." The number of banks has fallen from 47 four years ago to 15 today. Weaker banks have been forced into merg-

ers hy the central bank, which has steadily increased minimum capital requirements after early criticism that its supervision was lax.

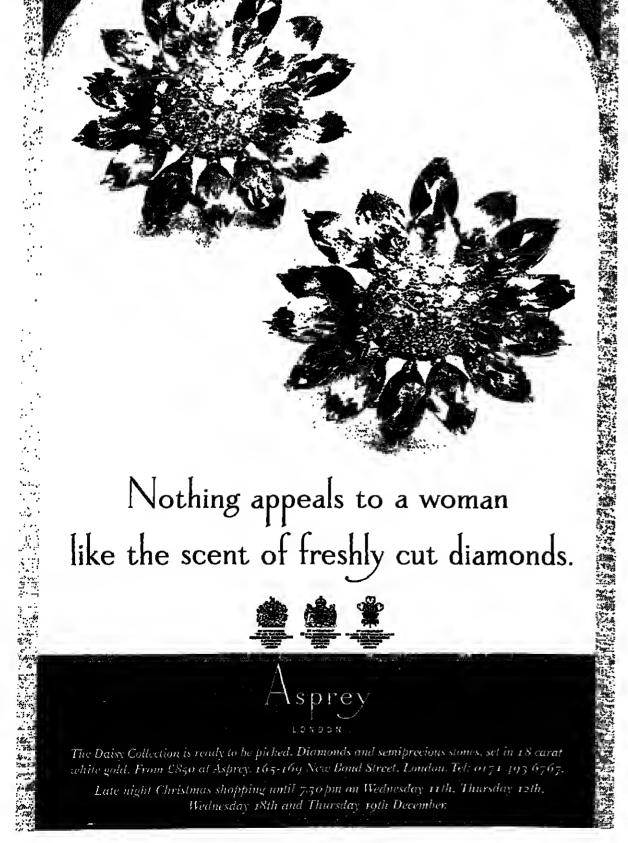

But Estonia cannot afford complacency in banking or any other sector of the economy. As negative real interest rates promots investment - particularly in real estate - economists are worried that the quality of the banks' loan portfolios will

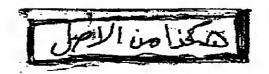

A very large trade deficit -23 per of gross domestic product last year, and growing - could put pressure on the kroon and on the free trade regime, although economists say many of the imports contributing to the deficit are of capital goods for investment projects.

Above all, Estonia's future depends on Russia. The long queues of lorries at the border in Narva to take goods in and out of Russia show how much Estonia's 1.5m people depend on the 150m Russians next door. Already a tenth of Estonian economic activity is accounted for hy

transit trade. The relationship, however, remains difficult. Tallinn and Moscow bave been unable to resolve a dispute over their mutual border, amid Kremlin complaints that ethnic Russians in Estonia - a third of the population - are maltreated.

Local Russians are less strident. Still, the noises from Moscow are a serious concern. With Nato looking unlikely to meet Estonia's requests for early inclusion in the alliance, the Tallinn government is pushing for European Union membership and more western investment in an effort to bolster its security. Estonia's husiness executives know that the country's future prosperity depends on both

A September 4 far = -

There are three reasons for optimism. The first is the more positive attitude of the US towarda its relations with China. The second is the agreement at last month's summit of the Asia Pacific Economic Co-operation forum, between US President Bill Clinton and China's President Jiang Zemin, to push ahead with negotiations.

The third and most important is the concrete steps being taken by China Itself. The package of further trade liberalisation measures announced at the WTO ministerial meeting in Singapore by China'a assistant minister for foreign trade, Mr Long Yongtu, is an example. This follows the country's commitment to currency convertibility oo current account. Progress has also been made in bilateral negotiations on market access and at the most recent meeting of the working party on China's WTO accession.

The devil. inevitably, is in the detail. But the broad outlines of a deal are at last emerging. China, for its part, has an agreed transition to full condropped its demand for compre- formity with the WTO.

tus. It now seeks specific transition periods in sensitive areas. ganisation of its state-owned enterprises (SOEs) cannot be resolved overnight. But China needs to remember that a timephased commitment to aliminate explicit and implicit subsidies to SOEs is, as is true of all the other WTO obligations, in its own long-term interests.

should accept China as a member, provided it offers satisfactory market access and a timetable for adopting WTO rules and obligations. Not least, the US, the chief protagonist in these negotiations, needs to abandon the outmoded ritual of annual renewal of China's mostfavoured nation status. Acceptance of China as a WTO member entails willingness to abide by the fundamental principle of non-discrimination.

In turn, members of the WTO

China's membership, alhelt highly desirable, should not be permitted with anything less than a commitment to bring its policies and practices in line with those of the WTO. To accept China without that promise would store up trouble, not only with China, but with other applicants. Yet to wait until China had finished all its reforms would be no less unreasonable. The solution is membership now, accompanied by

who are huying in on fresh terms. Pre-emptive rights solve the problem by giving shareholders a choice: they can take first pick of the cheap shares or sell their options for cash to other

issue, new shares tend to be standard fees in an apparently offered at a 15 per cent discount to the share price on the day of first raised alarms two years ago. the issue. The shares usually remain on sale for three weeks. Provided that the price of new shares stays below that quoted in the stock market during that time, they will be snapped up by either existing or new investors. But if the stock market price

falls below the one at which new shares are offered, they will not be worth buying and the issue will fail. To avoid that risk, companies tend to insure themselves by asking a merchant bank to underwrite the issue. For a standard fee of 2 per cent, the bank guarantees to buy the shares if

a company wants to raise fresh equity capital for an acquisition the market price falls too far. or for organic growth, it must The merchant bank itself keeps find investors who are willing to half a percentage point of the fee, and pays a quarter to a broker for distributing the issue. The buy new shares. The most obvious way of doing so is to sell them at a discount to the current remaining 1.25 percentage points price of its shares in the stock are paid to a group of 200 to 300 market. If it does this without investment institutions who take any pre-emptive rights, it will in on the underwriting risk from effect transfer wealth away from the merchant bank in the three-

current shareholders to those week offer period - a job known as sub-underwriting.

These fees have been fixed for huilding society flotations. They have been applied for companies large and small, in every indus-

hy Mr Paul Marsh, a professor at the London Business School. which found that the subunderwriting fee was vastly in excess of the risks that institutions took, although Mr Marsh supported the principle of rights issues. Cases of sub-underwriters having to buy up shares at a loss - such as the 1987 British Petroleum flotation - were rare. In total sub-underwriters had made what Mr Marsh described as an "excess profit" of £490m between

One unusual aspect of underwriting commissions is that lack of competition does not stem from a shortage of participants. There are several bundred subunderwriters - mostly pension funds and life assurers - in the London market, but finance directors have not exerted much pressure on their merchant

> The OFT commissioned a study underwriters, rep- reflect the discount. resented by the National Association of Pension Funds and the bave retreated. In the face of OFT scepticism, and the threat of an MMC referral, big investors declared they were willing to see commissions trimmed.

The first results of this attitude change came a month ago, when launched a £222m rights issue for the hotels group Stakis in which Schroders managed to knock such a move would probably lead some £400,000 off its bill. Mr David Challen, chairman of ootcome of the OFT inquiry, the

intended only as a "straightforward variation" of a rights issue. which has proved a 'very effective method of providing companies with certainty and continuity in raising capital". Other similar auctions, led hy Schroders and others, have followed.

This bas been enough to per suade Mr John Bridgeman, the director-general of fair trading, to postpone an MMC inquiry. However, it has not damped tensions between traditionalists sucb as Schroders, and the large invest-meot banks that champion alternatives to rights issues. They say the flaws of traditional rights issues go far deeper than excess sub-underwriting commissions.

One corporate financier at a US iovestment bank says preemptive rights are overly expensive because companies have to issue shares at an undue discount. He says that book-building is preferable because it allows a company to identify untapped sources of investment, and issue

oew shares at a higher price.
"If British companies could market their shares to a broad range of investors around the world, they could find cheaper sources of capital," the financier adds. That view is backed by Mr Amir Eilon, BZW's bead of canttal markets, "To say the price of sbares does not matter is like saying the price of cocoa does not matter to a chocolate-maker," he

BZW bas attempted to square the circle by proposing to use technology it has employed in book-huilding exercises for companies such as Bank of Scotland. It says it would market new shares for three weeks, finding a suitable price. Rights-holders would still have first call on the shares, provided they had bid high eoougb.

Organisations such as the NAPF bave been open-minded about the BZW initiative but investment funds are privately sceptical. "They have not told us how much it will cost yet," says one fund manager. Another estimates that companies using book-building to issue shares in the UK bave been charged between 4 and 6 per cent by the

banks involved. Supporters of rights issues insist that it is more expensive to son why it has lasted is that it raise equity capital in the US, has benefited large sharebolders. where the commissions charged shares at a good price, but can ing new capital range between 3 of discount in a rights issue does espite initial pro- not affect the cost of capital in tests that Mr itself - capital only becomes Marsh's sums were more expensive if a company wrong, the sub- fails to adjust its dividend to

"If there are people out there who are willing to pay more for a Associatioo of Britisb Insurers, company's shares, there is a stock market where they can do it any day of the week," says Mr Marsh. He argues that the erosion of pre-emptive rights in the US took place before the rise of powerful institutional investors which would not be likely to the merchant bank Schroders accept such a change these days. Yet if the fight is over in the US, it is only now picking up sub-underwriting commissions pace in the UK. No large UK comwere partially tendered. at the altar

■ December is the wedding senson in India. And since Indian weddings are elaborate affairs, just about everyone attends several weddings a week - Including prime minister ceremonies and celebrations the business of government slows down to a, well, famously Indian

One casualty of the season is M.S Gill who, it emerged . yesterday, is to succeed T. Seshan as Indian's next chief election commissioner - the most powerful civil servant in the land. The song is that prime minister Gowda - who just loves weddings - forgot to sign the cabinet papers confirming his appointment. Apparently the PM told Gill, currently a plain election commissioner, of his promotion in a quick telephone chat before rushing to catch a flight for a wedding in Madras.

This delicate situation has left Gill, a distinguished public servant, unable to attend weddings because he is barricaded in his house by several score of media wallahs demanding confirmation of the country's most important civil service appointment. But Gill must keep quiet . which alone marks a significant

Left standing departure from his famously talkative predecessor - until the prime minister returns home from his happy engagement. Let'a hope they live happily ever

Tan the man

These are turbulent times for Lucio Tan, the Philippines' most powerful ethnic Chinese husinessman and majority owner of Philippine Airlines The threat of swingeing cuts in PAL's modernisation programme looks like a serious setback for the airline - known by local wags as Plane Always Late which six months ago finally looked to be flying clear of trouble.

Then again, one never knows with the publicity-shy Tan, whose business empire also includes Asia Brewery - the country's second largest drinks company - and its biggestselling cigarette brand as well es Allied Banking Corporation.

One theory is that yesterday's ents are part of a bargaining ploy designed to show the government and unions that PAL really can't afford pay rises for its staff this year. Employees last month tried to put pressure on Tap by stoging wildcat strikes in the run-up to the high profile Apec leaders' But even without the

troublesome airline. Tan has his hands full. The government is pressing for higher taxes on 'sin" products such as beer and tobacco which feature prominently among his business interests.

Tan is also part of a consortium of Filipino-Chinese tycoons which last week withdrew from bidding to build Manila airport - a pet project of President Fidel Ramos. Not bad for a man who says that he likes to keep a low public profile.

US deficit hits record \$48bn after export fall

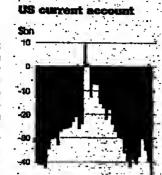

By Gerard Baker in Washington

The US current account deficit hit a record \$48bn in the three months to September as the country suffered its first drop in exports for more than three years and payments from foreign-held assets in the US rose

The deficit was up 19.3 per cent from the previous quarter, seasonally adjusted, the Commerce Department said yesterday. Imports rose by 0.7 per cent to \$201.5bn while exports fell by 2.1 per cent to \$149.9bn, the first quarterly drop since the summer of 1993. As a result the merchandise trade deficit also rose sharply

to \$51.6bn, up by 9.8 per cent

from the previous quarter. The deteriorating balance of payments reflects the continuing imbalance in the world economy, as US growth remains robust while most of the rest of the world is relatively weak. But the pace of decline may troubla policymakers since it could lead to downward pressure on the dol-

political calls for a tougher

stance in international trade negotiations. Every main component of

the current account moved in a negative direction between the second and third quarters, with an increase in the deficit in investment income, and a decline in the surplus on ser-

The current account deficit rise was the third in a row and took the total deficit for the first nine months of the year passing the old record of \$43.2bn set in the fourth quarter of 1987. The deficit for the full year is expected to come close to the record annual figure of \$166.3bn in 1987.

The trade balance was hit by relatively strong demand growth at home and west growth overseas. Though lomestic demand was decelerating from its rapid growth earlier in the year, slowing the rate of increase of imports, purchases of foreign goods continued to increase. Sluggish demand in the main foreign markets was responsible for the fall in exports. The surplus on services was

\$17.8bn, down 3.5 per cent from the July-September period. The country's deficit on its investment income account rose sharply, as interest and dividends paid on foreign assets in the US increased. The main contributor was a sharp rise in interest paid on US Treasury securities, reflecting greater foreign purchases of government paper. Total payments from foreign owned assets in the US rose from

removal of non-tariff barriers, such as quotas and import licensing requirements. It might also consider relaxing further restrictions on foreign finanallowing foreign-owned banks to do business in China's national currency. But it was unlikely to improve soon on Mr Long expressed confidence that the US - which Bei-

Hoechst/Clariant

Hoechst has found a neat way to extract value from its vast but lackhistre speciality chemical business. Not only is it injecting the business into Clariant, the Swiss speciality chemical group, but it is pumping it full of debt first. The result is Hoechst will enjoy an immediate DM3.5bn- DM4bn (\$2,25bn-\$2,5bn) cut in its own debt and end up with a 45 per cent stake of the enlarged Clariant, worth a forther DM2bn. The resulting DM5.5bn-DM6bn implied valuation, equivalent to 90 per cent of sales, is not bad for a

business with poor margins. For Clariant, the deal is also attractive, because of the scope to slash costs. Its target of annual

So France's scheme for a political force to offset the power of the planned European Central Bank under monetary union has been revived. President Jacques Chirac and Mr Alain Juppé, his prime minister, have been pushing the idea in recent days. For Germany, which takes pride in the fact that the ECB's independence is enshrined in the Maastricht Treaty, the development most be worrying. Bond markets, which are assuming the euro will be as strong as the D-Mark, should take note too. After all, a bunch of politicians meddling in monetary policy hardly seems a recipe for low inflation.

Admittedly. France's proposals are rather fuzzy. If all it wants is a G7-type talking shop, bond markets can probably live with it. But France's rbetoric seems to go beyond that: it wants heads of government to have a regular dialogue with the ECB, influence exchange rates and give their opinion. The inference is that it expects the RCB to listen to this opinion. If so, the ECB's primary objective of ensuring price stability could be diluted.

double over five years. Add in the There are two risks for bond marfact that debt is cheap and tax-effikets. One is that France will get its cient, and the boost to earnings way, in which case it will be difficult to argue the euro will be as would be even more impressive. hard as the D-Mark. The second is that political oversight of monetary tation as one of Germany's leading exponents of shareholder value. It is well on the way to disciplining its policy becomes a sticking point between France and Germany at this week's European summit in sprawling empire; and further partial spin-offs seem likely. A looming Dublin. The two countries are question, though, will be how to already arguing over how tightly budget deficits should be controlled exploit its own balance sheet which, after monetary union. Another area after the deal, will have not debt of of difference would increase the only DM6on or so. Share buybacks chance that Emn will not proceed should soon be on the agenda. as planned in 1999.

Shell

Shell has kept investors on tenterhooks for so long with hints of restructuring its underperforming European refining operations that yesterday's announcement was bound to be an anti-climax. After all, the only hard proposal - to sell a refinery in Switzerland - deals with less than 4 per cent of Shell's finds, the costs of developing them Buropean refining capacity. And the company is not suggesting the refinery will be closed if no buyer can be found. So the big problem, oversupply in the market, remains.

To be fair, the problem is not so much a failure to grasp nettles as overblown investor expectations. And if anything, Shell's characteristically discreet optimism over the likelihood of an industry-wide savings of DM600m is certainly a restructuring in French refining

looks good news. If such a deal can be done reasonably soon, few would argue that Shell would be better off closing a French refinery unflaterally rather than waiting to share the pain. The episode does, how-ever, underline how far Shell shares have been buoyed by great hopes of future restructuring benefits. There is plenty of evidence - notably the planned alliance with Texaco in the US - to back these expectations np. But so there is at Shell's competitors, and the restructuring premium still evident in Shell's high relative rating looks difficult to justify. It is no criticism of Shell's management, but investors can find better value elsewhere.

RJB Mining

For most of the past two years big management challenge, given it investors have been stunned by is in effect acquiring a business three times its size. Still, the debt RJB Mining's sparkling performance. But as yesterday's 23 per cent alide in the share price showed, they should have been market capitalisation - will keep executives on their toes. If Clariant focusing on longer-term worries: can make and then keep most of the the company's need to renegotiate its juicy eupply contracts with power generators which lapse in March 1998. Ironically, it was a quite different issue - sterling's recent rally - which prompted yesterday's 18 per cent downgrade in All this reinforces Hoechst's repuforecast 1997 earnings from housebroker BZW. But whatever the cause, it is the contract worries which are now firmly at the forefront of investors' minds.

The outlook for RJB is not good. It needs to continue generating strong cash flows which can be invested to arrest falling production. But sterling's strength depresses prices and weakens the management's hand in the renegotiation of its supply contracts. Further productivity improvements will have to be made if future contracts are to be at all profitable, let alone generate the 15 per cent operating margin the company cur-rently enjoys. With old mines and declining ore bodies, this is a tall order. And even if RJB makes new will depress earnings.

医乳浆素 电轴线

Despite all this, the shares look oversold at current levels, which put RJB on a measly forward price/ earnings multiple of around 4.5 times for 1997. Even the most grisly pessimist would have to concede that RJB has a longer life expectancy than that.

Amper but this sale was never Telefónica's chairman Juan Villalonga: he says retail investors will be allocated 60 per cent of the offering

Baesa fails to satisfy investors after big losses

By Stephen Fidler, Latin America Editor

Executives at Baesa, the beavily indebted Argentine bottling company which is 24 per cent owned by PepsiCo of US, moved yesterday to reassure investors that they had resolved problems that caused large losses in its Brazilian

But they failed to ease doubts about the future performance of the company. Pepsi's largest international bottler, and left analysts dissatisfied with the level of disclosure.

As company officials led by Mr Lucho Suárez, chief executive officer, held a conference Brahma in 1994. Mr Suárez call with investors and analysts. Baesa shares fell 10 per cent - to \$4.50 per depositary receipt on the New York Stock in Brazil, a move some inves-Exchange - following a 5 per cent loss on Monday.

still have very little confidence some distribution plants, cut that all the operating issues in Brazil have been addressed, although the management says they have," said Mr Carlos Laboy of Bear Stearns in New York.

On Monday, the company reported a net loss of \$151.6m under US accounting rules for the fourth quarter ended September 30, against a net profit of \$5.4m a year earlier.

This reflected, in part, oneoff charges totalling \$75.6m. including a \$40m non-cash provision for accounting irregularities at Baesa's Brazilian subsidiary "involving inappro-

priate capitalisation of certain expenses". Sales fell 18 per cent in the quarter to \$134.7m from \$164.2m.

The net loss for the year was \$452.4m compared with a 1995 profit of \$44.8m. Sales rose 1.5 per cent to \$680.2m from 3670.4m. The losses are another blow

to Pepsi's ambitions in Latin America, its bottler in Venezuela, the one Latin American country where it had a majority market share, defected in August to Coca-Cola.

Baesa bas had difficulties in Brazil since it took over the Pepsi franchise there from the beer and soft drinks company said yesterday the company had now appointed Portuguese-speaking management tors consider long overdue.

Baesa also said it had a new "The bottom line is that we pricing strategy, had shut its Brazilian staff to about 1,000 and doubled capacity utilisation at its São Paulo plant to almost 40 per cent in the quarter.

However, analysts complained that the conference call added little information about the nature of the Brazilian losses. This would have to await filings with the US Securities and Exchange Commission, they said.

It also left open questions about whether Pepsi would eventually emerge as Baesa's largest investor, as was once expected, Mr Laboy said.

Barry Riley

Bears lose Greenspan's Christmas present

managers must last week that Mr Alan Greenspan, the US Federal Reserve

chairman, was offering them an early Christmas present.

Like the London fund managers, Greenspan thinks that US equities are becoming dangerously overvalued. Unlike them, he is actually capable of talking Wall Street down. But only briefly - this week US equities have bounced back as the "buy on the dips" instincts of investors have resurfaced.

Wall Street is high because it is the indirect beneficiary of freak flows of liquidity that have been reducing risk premiums globally. Mere words from the Fed chairman cannot change that but interest rate rises in the new year might begin to do so. .

At any rate, the short-lived hopes of London-based managers that a sudden Wall Street dive mig 't rescue their year-end performance figures have been dashed. Their big gamble of heavily underweighting US equities will again cost their clients money in 1996 - although less seri-

ously so than in 1995. We can look at statistics for UK pension funds, to some extent a proxy for the global strategy of London-based man-agers. Sticking grimly to their roughly cost about 130 basis guns, they have continued to points of underperformance sell into the strength of Wall

Street this year.

According to WM Company's database, the US accounted for 19 per cent of overseas equity

Index return so far this year.

But of the big four geographical bets the pension fund to the rescue, this time bringing the cavalry with him.

ally smaller and more aggressively managed funds tracked Basin Ex Japan, to double the by the rival Caps performance Continental European expoto 10 per cent.

For comparison, the weighting of the US in the FT/S&P is now 49.3 per cent, ominously similar to the weighting Tokyo enjoyed just before its own bubble burst early in 1990. Getting the world's biggest

stock market so wrong for two years has damaged the UK's reputation as a centre of excellence for global equity man-

With sterling strong, global equities have looked unexciting to British eyes

agement. The failure gives USbased managers an opportunity to poach business from the pin-striped brigade. Alternatively, of course, a Wall Street crash could quickly restore the pre-eminence of London and Edinburgh. Wall Street's renewed

strength this autumn has been expensive. The typical global asset allocation of a UK penagainst the World Ex.UK may be poorly controlled.

Fleetingly, portfolios in January, falling only the US underweighting London based to 15 per cent by the end of has gone wrong. The other global equity September. Among the gener-three decisions – to triple the index exposure to the Pacific service, the exposure is down sure and (slightly) to under-to 10 per cent. sure and (slightly) to under-weight Japan – have all added

This is, however, only a top-Actuaries World Ex UK Index down analysis. The predomi nantly value-oriented UK-based managers seem to have done badly with stock selection in the US. too. But they have been more successful at picking stocks in Europe and Japan, so globally there may have been some bottom-up

value added in 1996. Overall, the performance will have been disappointing, but salvageable. With sterling strong, global equities anyway have looked unexciting to British eyes - the World Index in sterling has climbed only 4 per cent. It has been held back, especially by Japan.

The big managers must however, hold inquests on the missed US opportunities. One focus will be on the shortcom ings of valuation-based decisions. Fundamentals still matter, but there is also a need to analyse the scope for liquidity. driven valuation shifts.

There is also the question of whether risk controls should be rebalanced. The complica-tion is that the UK pension fund managers tend to measure themselves against a peer group asset allocation rather than the World Index, so that client risks in absolute terms

EUROPEAN NEWS DIGEST

Chrysler to boost European output

Chrysler, the US car maker, plans to boost output of its Austrian built Grand Cherokee sports utility vehicle to help meet its target of doubling European sales by early next decade. Output of Grand Cherokees, which are built under contract for Chrysler by Steyr-Daimler-Puch, the Austrian industrial group, will rise from 47,000 to 65,000 units a year by early 1999. SDP is investing \$160m to expand the Graz plant to meet the target.

Chrysler has extended its production agreement with the Austrian company by six years to 2004 to justify the additional spending required by SDP.

Audi to lift Brazil capacity

Audi, the up-market subsidiary of Germany's Volkswager cars group, yesterday announced plans to build a new plant in Brazil. The factory, near Curitiba in Parana state will initially produce 60,000 Audi A3s and next-generation VW Ventos a year. However, output will rise to about 140,000 units a year with the almost certain expansion of the project to include building 80,000 next-generation VW

Separately, Mr Herbert Demel, Audl chairman, who was ast week appointed the new head of VW's big Brazilian subsidiary, forecast that group profits this year would be "at least 25 per cent" up on the DM589m (\$378m) made in

Ansaldo merges signal interests

Ansaldo Trasporti, the Italian state-controlled transport engineering group, yesterday set the seal on a merger of its railway signalling interests that creates the world's econd-largest manufacturer in the sector after Siemens of Germany with an annual turnover of about L700bn

The new company, to be called Ansaldo Signal, will be quoted on the Nasdaq stock exchange in New York. Ansaldo Trasporti will control 72 per cent. Compagnie des Signaux (CS) of France 9.8 per cent, and public shareholders the remainder.

Ansaldo Trasporti, which comes under the umbrella of the Finneccanica engineering company, has set up Ansaldo Signal to reinforce its international presence and group the knowhow of individual manufacturers. In addition to the CSEE Transport interests of CS, the new company will control Union Switch & Signal, Ansaldo Trasporti's quoted subsidiary which is market leader in

Telecel shares gain 19.5%

Shares in Telecel, Portugal's dominant mobile phone operator, gained 19.5 per cent in a first day of heavy trading yesterday as international investors sought to increase the allocations made in Monday's strongly oversubscribed initial public offer.

The shares, which were sold at Es7,950 each in the global offering, opened at Es9,000 and climbed to a high of Es9,849 before closing at Es9,500. The market value of the company, which is controlled by AirTouch, the US cellular phone operator, rose from Es170.9bn to Es204.2bn

Portugal Telecom, the country's monopoly fixed-line telecommunications operator, also closed at a record high of Es4,353, up 3 per cent on Monday's close. Peter Wise, Lisbon.

Rémy Cointreau cuts loss :

Rémy Cointreau, the French wines and spirits group, yesterday uncorked sharply reduced interim losses after lower financial charges helped offset the impact of higher promotional spending.

The company, best known for its Remy Martin cognac, Cointreau liqueur and Krug and Piper-Heldsieck es, reported a pre-tax loss of FFr1m (\$1) for the six months to September 30, against a loss of FFr39m a year ago. Including exceptionals, however, profits dipped markedly, from FFr215m in the first half of 1995 to FFr41m. The year-ago figure included a FFr257m exceptional gain from the sale of the Picon brand. In the latest period, the company recorded a comparatively

modest FFr44m exceptional gain. Turnover rose 4 per cent from FFr2.94bn to FFr3.07bn.

The company's shares closed up FFr1, or 0.7 per cent. at FFr138, against a slight fall in the benchmark CAC 40

Israeli telecoms to be opened up to competition

Paltel on fast track to solve communication problem

By Judy Dempsey in Jerusalem

The Israeli government yesterday unveiled plans to open up the domestic telecommunications network to competition in one of the biggest shake-ups in the state-run

The programme, due to take place by the end of 1998, will lead to the dismantling of the monopoly held by Bezeq, the state-dominated telecoms network, and offer tha consumer a wide range of services at lower prices.

It follows a government decision last month to grant licences to two telecoms consortia including Sprint of the US, Germany's Deutsche Telekom and Italy's Stet, to provide international communications services in Israel in competi-

burry. As director-

phone network, almost certain to dent Bezeg's monopoly.

Licences will also be granted to provide services in infrastructure and transmission which will include the cable television mar-

Analysts said the government plans offered exciting opportunities to investors even though Israel bas a small market. In terms of the number of calls, the domestic market grew 10.5 per cent in 1994 and a further 16 per cent last year.

in addition, the scope for multimedia services and home shopping via cable or satellite have not been tapped.

The unknown factor for any investor is the peace process. If it continues, analysts said investors

in Israel's domestic and international telecoms markats could expand into neighbouring Jordan and Egypt where telecommunications remain untapped and starved of investment.

For instance, 27 per cent of Bezeq's revenues are reinvested compared with 3 per cent of Jordan's revenues.

• A subsidiary of Siemens, the German telecommunication and electronics group, and Elscint, the Israeli advanced medical imaging company, have agreed on a joint development and production programme aimed at developing compnterised tomography compo-

Mr Jonathan Adereth, president and 1995's DM102m, he said.

Mr Thoma said popular programmes, such as Formula 1 car racing, would continue to drive earnings at the network, which currently attracts 16 per cent of domestic viewers. In 1997 RTL would cross the DM2bn mark in net sales and make profits of DM150m.

Next year will also see the restructuring of the networks currently operating under the RTL name. Alongside the main RTL network is RTL2, which broadcasts mainly films and series, and Super RTL, a children's

At present the three bave differing ownership structures. The main RTL channel is owned by CLT-Ufa, the company recently created out of a merger of CLT of Luxembourg and Ufa, a sub-sidiary of Bertelsmann, the German media group. CLT-Ufa has a minority stake in RTL2, while Super RTL is jointly owned with Disney.

This arrangement was brought about by German media laws, which stipnlated that no company could own more than 30 per cent of one network. The law is to be replaced on January 1 by a ruling assessing a company's presence in the market in terms of total market share, not the number of networks it owns.

This will allow CLT-Ufa to bring together its interests in a single bolding company, which Mr Thoma said could be created by the mid-

dle of next year.

The fate of Vox, a small network which CLT-Ufa coowns with News Corporation and Canal Pins of France, is also unclear. Mr Thoma said Vox could be turned into the news channel of RTL.

News Corporation is also involved with CLT-Ufa's main rival, the Mnnichbased Kirch group, through British Sky Broadcasting, the UK satellite network in

UPM-Kymmene and Metsä in deal after Stora of Sweden, with Investors reacted enthusialthough it would add some

By Greg McIvor in Stockholm

The consolidation of the Nordic forestry industry wben UPM-Kymmene, Europe'e biggest pulp and paper group, agreed to trans-fer two production plants to Metsā-Serla, a Finnish competitor, for FM2bn (\$429m).

The deal highlights a continuing drive by both companies to concentrate on core businesses. For UPM-Kymmene, it marks a withdrawal from paperboard production and an increased focus on its newsprint operations, where it is European market

over UPM-Kymmene's paperboard capacity, will become one of Europe's leading producers of the grade.

astically. UPM-Kymmene shares rose FM3.80 to FM97 and Metsä stock advanced

FM1 to FM35. A complex swap agreement involved both companies extending their existing co-operation in pulp production by each transferring one pulp mill into Metsä-Botnia. an existing joint venture between the two in which Metsä bolds a 52 per cent

The partners said tha alignment would facilitate collaboration on pulp production decisions, belp spread costs in a very capital-intensive industry. and offset cyclical exposure.

In addition, Metsa is to purchase UPM-Kymmene's sole paperboard mill, at Simpele in Finland, making it Europe's second-largest pro-

ducer of folding board boxes

annual capacity of 520,000 Mr Heikki Sara, UPM-

Kymmene senior vice presi-. dent, said the transfers meant the group would not have to bear the whole burden of required modernisation work at its Joutseno pulp mill, which is to be subsumed into the joint venture. Pulling out of board production would focus attention on core busine

Mr Jorma Vaajoki, Metsä chief executive, said: "The Simpele [paperboard mill] deal is a major step in making the size of our packaging operations equal in size to printing paper

operations. Mr Mads Asprem, paper and packaging analyst at Morgan Stanley in London, said the deal out quite a lot of things"

pressure to Metsa's balance sheet. "The consolidation in Finland is now complete and UPM-Kymmene is ready for major steps outside Europe,"

The traneactione will boost Metsā's turnover almost FM2bn, to about FM22bn. It will pay FM870m of the FM2bn purchase price in cash; the balance will be invested by UPM-Kymmene in Metsä-Botnia shares and a shareholder loan.

.UPM-Kymmene said this structure would finance a FM650m upgrade of the Joutseno mill. Its nine-month pre-tax profits feli from FM4.6bn last year to FM2.6bn.

Metsä posted nine-month pre-tax earnings of FM336m. against FM1.3bn. Both companies bave been hit by weak pulp prices in 1996.

Black & Decker declines 15%

AMERICAS NEWS DIGEST

Black & Decker shares dived 15 per cent yesterday morning after the US tools and appliances company warned that its 1996 profits are likely to be below. analysts' estimates, and its first-quarter earnings in 1997 lower than in 1996. The company said its earnings per share are likely to be lower than \$1 for the fourth quarter of 1995 and \$2.40 for the full year.

Mr Nolan Archibald, Black & Decker chairman and chief executive officer, said that the shortfall would be primarily due to lower than anticipated sales in power tools and accessories. Sales growth is likely to be 28 per cent in the fourth quarter, instead of the 5-6 per cent previously projected. Black & Decker blamed the

disappointing performance partly on weak economies in . Europe which "failed to recover to the extent that we had anticipated". The company made substantial job cuts in Surope this year in order to reduce costs, and Mr Archibald said be was optimistic about sales growth in

However, the company said it expected to see a more favourable fourth-quarter tax rate, below the 27 per cenf reported for the first nine months, which will partially offset the impact of the weaker operating results. At the end of the morning Black & Decker shares were trading at Trucy Corrigan, New York

Heinz on track to meet target

H. J. Heinz, the US food group, yesterday reported a 12 per cent increase in net profits to \$177.5m for its fiscal second quarter to October 30, with a similar increase in earnings per share to 47 cents. The result was slightly above the 46 cents a share expected by Wall Street analysis, but the shares slipped \$% to \$86% in early trading.

Mr Anthony O'Reilly, chairman and chief executive, said the company had

said the company had seen another strong quarter of profit and top-line growth, with revenues up nearly 5 per cent to \$2.39bn and operating profits up 7 per cent to \$352.8m. The company was on track to meet its target of double-digit growth in earnings per share for the full year, he said. Richard Tomkins. New Richard Tomkins, New York

Texaco in sponsorship venture

US oil leader Texaco has joined the Malaysian government and the Hong Kong-based HSBC international banking group in backing Ford and former grand prix ace Jackie Stewart in a £200m (\$329m) joint . venture to capture the Formula One world championship

The agreement is understood to be costing the oil group about £30m over the next five years. It means that the Stewart-Ford venture, one of the most commercially significant in grand prix motor racing, is now fully funded. The involvement of Malaysia, which is using the venture to promote its tourism industry, represents the first time that a nation state has taken on a Formula One. sponsorship role.

Biogen plans \$18m investment

Boston biotechnology company Biogen is planning an \$18m equity investment in another Massachusetis company, Creative BioMolecules, as part of an deal to invent new treatments for kidney disease. The value of the agreement could reach \$122.5m in equity, fees, research support, development, inflications and lines of credit. In exchange, Bloger receives exclusive worldwide rights to market and sell drugs sepaloped through the collaboration between the two companies.

Nestle to buy Aplt Foods

Nestle Canada is buying the ice clean and frozen yoghurt
business of Ault Foods for Cazzin (US\$166n), including a
processing plant in Ontario and distribution centres

Ault is now a Canadian dairy products group with annual revenues of C\$1.5bm, but its ice cream division is non-profitable because of price were led by Unilever. The deal will make Nestlé a leading competitor in the ice

CBOT set for election of next chairman

The 3,661 members of the Chicago Board of Trade will be asked today to elect the next chairman of the world's largest futures exchange. Mr Patrick Arbor, the cur-

rent chairman, is seeking a record third two-year term; and has been endorsed by the exchange's nominating

He is being opposed by Mr John Gilmore, a retired part-ner of Goldman Sachs who served as the exchange's chairman in 1986. Mr Gilmore is a third-generation CBOT member whose political support, as well as his family history, is concentrated in the active, but antique, grain futures pils at

Mexican rail deal stops industry in its tracks

A Southern Income and eye brow-raising important rail network; one question occupies the mind of the railroad industry on both sides of the US-Mexico border. Has this second-tier US rail operator bitten off more than it can chew? At the end of last week

Kansas City Southern. announced that its joint venture with Transportación Maritima Mexicana, Mexico's biggest transport company, had won a 50-year concession to run Mexico's Northeast Railway, a 2,500-mile network that came up for grabs as part of the Mexican government's privatisation effort.

Until then, there had been a widespread assumption that Union Pacific, the biggest US railroad, would win the competition, because it already carries the most rail traffic across the Mexican Kansas City Southern and

TMM, however, astonished the railroad tomstry by bidding \$1.4bm for the concession - nearly three times more than the \$527m bid by Union Pacific and ICA, Mexico's higgest construc-tion company. The bid was also far in excess of the \$540m offered by Grupo México, the copper mining

Railroad, a Texan operator. ING Barings in Mexico City said the price differential raised "the obvious question of whether [Kansas City Southern and TMMI completely misjudged the true value of the asset or had more pressing strategic reasons which justified such a

Analysts expressed concern over the high purchase price and the financial burden of such a costly acquisition. Moody's Investors Service and Standard and Poor's placed the debt of Kansas City Southern and TMM under review for a possible downgrade; by lunchtime yesterday Kansas City Sonthern's stock had plunged 9 per cent from Thursday's close.

The Northeast Railway is the jewel in Mexico's some-

what tarnished railway crown. It carried 40 per cent of Mexico's total rail cargo to 1994, although it has only 19 per cent of the total track. and it was the only one of Mexico's three main rail networks to make a profit. Revenues in 1984 were 1bn pesos, about \$300m before the currency'e devaluation.

Kansas City Southern Railway, the rail unit of Kansas City Southern Industries, is: hardly any bigger than the Northeast Railway. It covers 2,900 miles on a north-south axis between the Gulf coast and the midwest, with terminals in Kansas City, Shreveport, Port Arthur, New Orleans and Dallas, Last year's profits were \$11.4m on revenues of \$502m.

The Kansas City Southern network does not go all the way to the Mexican border. but the company has

Heavy load: Veracruz station, Mexico, part of the Northeast Railway untwork

so-called trackage rights over Union Pacific rails that extend its reach to the border town of Laredo, the northern-most point of the

Northeast Railway network. Mexico's rail transport system is so slow and inefficient that only 12 per cent of goods travel by rail, compared with about 40 per cent in the US. But two-way trade between Mexico and the US

- already worth more than \$100bn a year - is booming under the North American Free Trade Agreement, and Kansas City Sonthern and TMM hope to put a greater

share of this trade on rails. Their business plan commits the joint venture to \$565m of capital investment in the Northeast Railway over the next three years. As the quality of rail transport improves, the joint venture one might say that one could believes it will carry 18 per pay a good deal more than

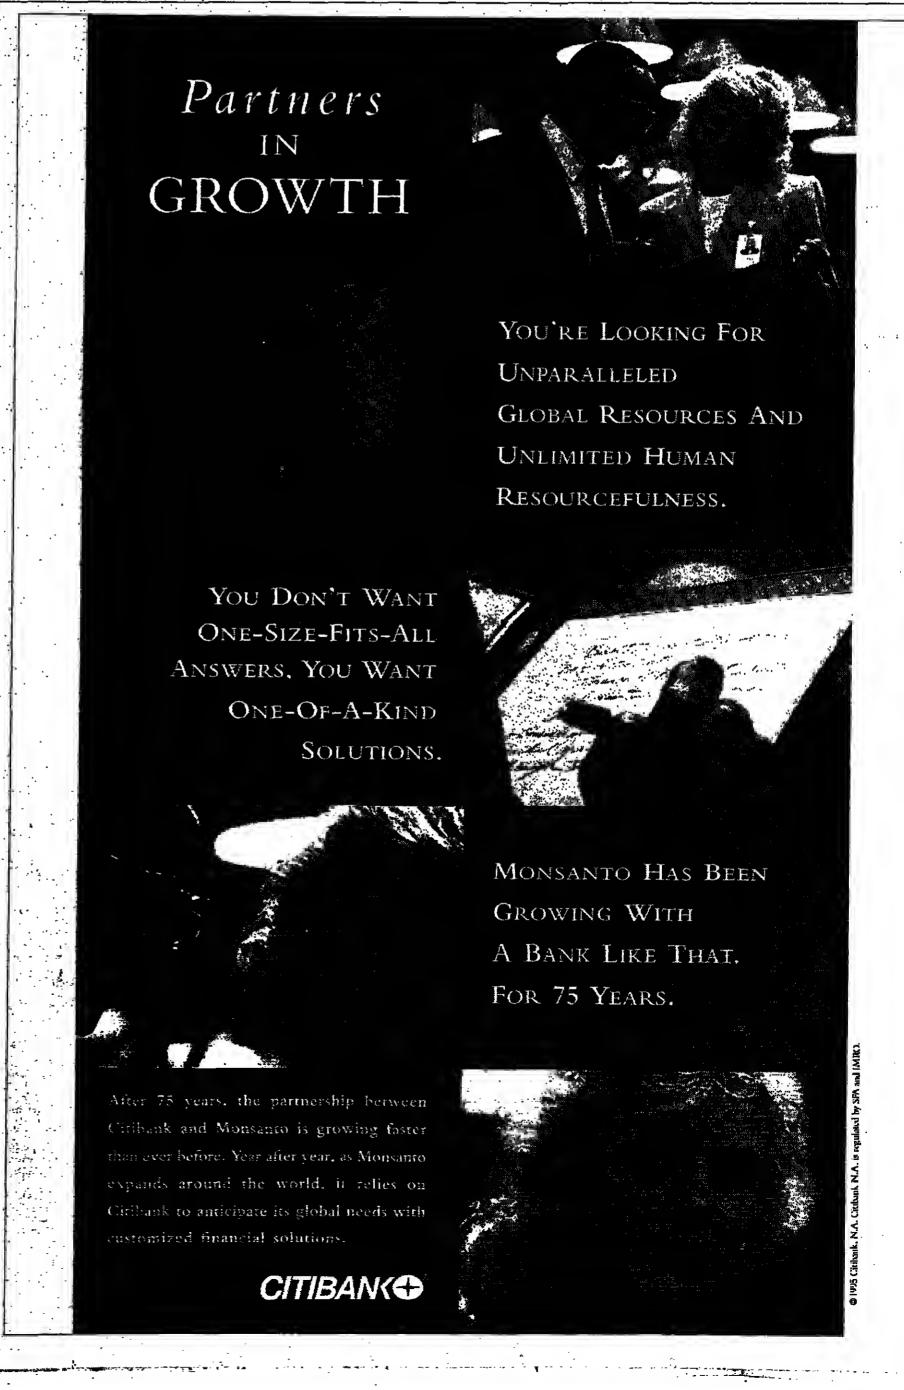

within three years and 20 per cent within five. Kansas City Southern'e chief executive, Mr Landon Rowland, acknowledged yesterday that the takeover would dilute earnings per share initially. But he predicted that operating profits

cent of Mexico's freight

would rise from \$50m in year one to \$311m in year three and \$471m in year five, and that the effect on earnings per share should turn positive in the third year. "With that kind of outlook

\$1.4bn and it would still make a good deal of sense," he said. In fact, the real question here is not why we bid so much, but why Union Pacific bid so little.

dual path for growth

Pewc has sights Pacific Electric Wire and Cable set on both diversification and expansion overseas

Pacific Electric
Wire & Cable (Pewc), Electric Taiwan's leading maker of wires and cables, plans to list a subsidiary on the New York Stock Exchange next year - the first time a Taiwanese company has held an initial public offering in the US.

The plan, which has been approved by US authorities, not only signals Pewc's efforts to raise its international profile and diversify its funding sources, but exemplifies the trend among Taiwanese groups to look overseas for growth and for the means to support it.

"The economic situation in Taiwan has changed completely. Manufacturing costs are high, profita are extremely low and the market for wire and cable is nearly saturated," said Mr Jack Sun, who runs the family-controlled Pacific empire, covering areas including the core wire and cable business to property to telecommunications and electronics. "So wa decided to move from being a predominantly local manufacturer to a regional manufacturer.'

Mr Sun predicts that in 10 years, the group's revenues rise from about US\$1.5bn in 1995 to \$8bn. By that time 70 per cent of the group's revenues will come from overseas, compared in China. with 30 per cent last year.

While expanding core businesses into overseas markets. Pewc is also moving aggressively into new and potentially incrative business areas, both at home and in the Asia-Pacific region. Ultimately, the new businesses will far surpass the company's core business in scale and profitability.

In 10 years, Mr Sun sales to come from the core half now.

Telecoms will be a new core business for Pewc, with years. Electronics will also local semiconductor maker. The company has also diversified into hotels, banking because we are all Chinese." and property with moderate

Northern Electric in supply negotiations

Northern Electric, the Newcastle-based electricity company facing a £782m (\$1.28bn) bostile bid from CalEnergy of the US, yesterday unveiled plans to increase dividend payments and to merge its electricity and gas supply businesses with another regional electricity company.

Although it did not name the other company, it is understood to be London Electricity.

Mr David Morris, chairman, said Northern would increase by 17 per cent to 50p a share its 1998 dividend and undertook to raise annual dividends by 7 per cent a year thereafter. Its full year dividend for 1996-97 will be 42.7p - up 7 per cent. Mr Morris encouraged

shareholders to reject CalEnergy's bid and stick with a management which he claimed had delivered on past promises. "Our bid final. "The choice enhanced dividend policy remains clear: 650p in cash promises. reflects the underlying strength and prospects of Northern Electric," he said.

CalEnergy accused the company of "rearranging the

deck chairs". On Friday the US independent power pro-ducer lifted its offer to 650p from 630p and declared the or a collapse in the price of Northern Electric ordinary shares," said Mr David Sokol, its chairman. company's second

left sector analysts impressed and speculating that the bid has become more difficult to call. The development which caught ths market's eye was the announcement of supply negotiations with another electricity company. North-

LEX COMMENT

Nthn Electric

Yesterday's defence was much sprightlier than Northern Electric's first attempt. Not only are there aggressive promises on dividends but the planned pooling of Northern's supply business with London Electric's should bring more purchasing clout and healthy cost savings. But although this plan is creative, shareholders should not get over-excited. If fat benefits can be extracted from combining supply businesses, other electricity companies will

Northern Electric

chunk of the benefits will probably be competed away Shareholders might also ask why the plan - together with some other titbits revealed yesterday - is only emerging now, after CalEnergy's final bid. If they had been disclosed earlier, CalEnergy's offer might surely have reflected them. Who knows? If Northern had revealed all to Calknergy at the outset, it might even have had more luck negotiating s friendly offer nearer £7.

As it is, even if Northern makes a last-ditch attempt with the increased special dividend it could still afford, shareholders are unlikely to back the management. Prudential, the biggest shareholder, quite rightly argues that CalEnergy's offer is not generous by the sector's previous standards. But it is still more than Northern's underlying value - and considerably more than its likely share prics if the bid fails. A last-minute counter-bid could yet emerge. But to block CalEnergy's bid in hope of a higher offer later on would be a formidable gamble.

TENDER ANNOUNCEMENT

itsubishi Voleting in talk

Costain plans to issue another tranche of shares in a further bid to bolster its finances following the sale for £52m (\$85.3m) of its US coal and London property interests, announced vesterday after the London stock exchange had closed.

The coal business raised much less than the construction and engineering group had expected when it attempted to sell the business earlier this summer. Mr Alan Lovel) also announced he is resigning as

Costain's chief executive. Renco, a privately owned US mining corporation, has agreed to pay an estimated \$34m for the coal operations.

It would also assume responsibility for \$13m of capitalised leasing obligations. Lonrho, the UK based con-

glomerate, in July had offered to buy Costain's coal business in a deal worth £50m but pulled out at the last minute.

Mr Lovell said higher than expected coal losses this autumn had forced down the

They also meant that Costain had breached UK Companies Act requirements that parent company net assets should not fall below 50 per cent of called up share

Mr Lovell said: "This is merely a technical breach and we will not be recommending any action when we report to shareholders at

an extraordinary meeting on company January 6." An earlier meeting on

December 27 will be asked to approvs disposal terms for the coal business and the separate sale for £23.4m of Costain's third share in the redevelopment of Spitalfields in London's East End to Metacorp of Malaysia.

Metacorp is 23 per cent owned by Intria, a Malayasian group, which this sum-mer purchased at 40 per cent stake in Costain as part of a £73.6m rescue abare issue.

Costain yesterday announced plans to raise at least another £5.4m from options to buy 13.4m new shares granted to Mr Henri Luhur, an Indonesian industrialist, and to Kharafi, a Kuwaiti based construction

Kharafi has a 25.35 per cent stake in Costain and wants to maintain it at that

Mr Lovell said the cash rsised would further strengthen Costain's finances which would remain constrained even after the coal sale.

The company at the end of October had net debt of £38m compared with share-holders funds estimated to be £10m-£15m following the US coal losses.

Mr Lovell said: "I had always intended to resign when Costain's financial restructuring was completed. It would be better if the company was run by an engineer from this point

Sterling's strength hits RJB

put to electricity generators in the UK under long-term contracts. But according to BZW, RJB has no contracts planned 35m tonnes output next year. The broker predicts the price of these tonnages will be cut by about £3/tonne, or 10 per cent, to imports, leaving the group without a profit on 11m tonnes of production.

Shell to sell Swiss refinery

By Deborah Hargreaves

Royal Dntch/Shell, the Augio-Dutch oil group, put its Swiss refinery up for sale yesterday as part of a plan to improve profits in its poorly-performing refining

Shell also said it would close two lubricants plants in the Netherlands and Belgium and concentrate its European lubricants production in Paris and Hamburg. The sale of the Cressier

refinery in Switzerland does little to change Shell's refining configuration, since it represents just 4 per cent of its Ruropean capacity. The plant produces 60,000 barrels a day and is not one of Shell's core operations.

Shell reported a 40 per cent drop in profits from its refining and marketing arm in the third quarter, to £337m (\$552.7m) despite higher volumes. European refining returns have been poor throughout the indus try for the past five years because of over-capacity. The company will join

other refiners in presenting an industry-wide rationalisation plan for sonth-east France at the end of January and restated its efforts to improve the profitability of its Shell Haven plant in the Thames estuary.

This is a set of very specific responses to our three weakest reflueries," said Mr Paul Skinner, director of Shell International Petroleum. The company's overall financial target was to achieve a 12 per cent return on average capital employed. "Refining has been in the single digits for 10 years ... It is unlikely the refining operations will meet that target in the next three to five years," he said.

The City was expecting more dramatic moves, and the shares fell just 1/10 to

is not just their problem", said Mr Nick Antill, oil analoct at RZW. Shell has refining capacity of 1.6m b/d in western Europe and its 14 refineries

Debutant Colt shrugs off market anxieties

By Nicholas Denton

Colt Telecommunications shrugged off the stockmarket plunge which has caused several companies to cancel flotation plans, and soared 13 per cent at the debut yesterday of its heavily oversubscribed offering.

Yesterday's closing share price of 310p - which values the company at £340m, about 11 times revenue - reflects the attraction to investors of alternative telecoms companies such as Colt, which are encroaching on the dominant European operators.

Through the share offering, and a parallel sale of high-yield debt, Colt is set to raise £190m to finance its expansion from the City of London to other main Euro-

pean financial centres. Fidelity, the US fund management company which has financed the three-year venture and owned 100 per cent, will see its shareholding fall to 73 per cent.

RESULTS

Colt, for which Morgan Stanley acted as global co-ordinator, first indicated a price range of 225-250p. Demand was so intense that Colt raised the issue price to 275p, but even at that level the offering was more than five times subscribed.

Wise Speke, Discovery Inns and Morgan Crucible have this week cancelled their flotation plans following last Friday's drop in world stock markets. But in the first day of trading on New York's Nasdaq market and the London Stock Exchange, unsatisfied demand for Colt pushed its shares 35p above the issue

price, giving investors an immediate £11m profit. Although Colt took only £22.5m in revenue in the first nine months and continues to make losses, investors expect it ultimately to emulate US counterparts. Ons US alternative sccess provider, MFS Communications, was taken over earlier

The higher price achieved

by Colt, and an expected 15 per cent increase in the issue size in response to demand, will generate proceeds of £85m, compared with the 666m first envisaged At the same time. Colt has upped a parallel issue of high-yield debt to raise a further

Colt provides cut-price telecoms services to large institutions such as Reuters, Bankers Trust, Midland Bank, the London Stock Exchange and the House of Commons, but is at present focused almost exclusively on the City of London.

The funds will finance its expansion as it builds a high-capacity fibre-optic telecome network in Paris and attacks German business markets in cities including Berlin, Cologne, Munich and Hamburg. Colt said it expected to raise further capital in 1999.

RJB shares are now on a prospective p/e of just 4.5 for 1997, offering a yield of 8 per cent. Total last year **52.1**♦ 7 7.5

CURRENCIES AND MONEY

Sterling rebounds further on Japanese buying

MARKETS REPORT

By Simon Kuper

The pound continued its plunge, on a day of slack to DM1.554 and Y0.1 against states joining Emu must trading ahead of the Euro- the yen to Y113.3. pean Union's Dublin summit

Sterling gained half a cent in London yesterday to close at \$1.652 and DM2.567. Traders said some Japanese the first stage in 1999, delayvide against outstanding But the lira recovered later, loans to Eurotunnel.

new record for the US cur- rency at L985.6. The D-Mark rent account deficit, because the shortfall was funded by record purchases by foreign investors of US treasury bonds. The US currency softened against the D-Mark and yen, partly on early talk that Kampo, the Japanese public fund, would hedge its foreign bond holdings because of the dollar's recent strength. The dollar was sup-

Call for more disclosure on LME metal positions

By Kenneth Gooding, **Viining Correspondent**

Clients with large positions on the London Metal Exchange should be forced by law to give details of these positions on a regular basis, an independent academic study urges today. The report, drawn up in the wake of the Sumitomo copper trading scandal, also calls for reform of the UK's Financial Services Act to make market manipubest deterrent to manipulation

Metals Futures: Lessons from they see evidence of the emer- per market, possibly from as early

Christopher Gilbert, professor of tive situation," he says. "Publica- He insists the Financial Services economics at Queen Mary and Westfield College. It calls for the same treatment of positions on all London's futures markets.

Mr Gilbert says the reporting of positions should distinguish those built up to offset over-the-counter contracts - and in the case of the LME should be extended to metal in the exchange's warehouses.

"Increased transparency is the since market participants can act The stndy - Manipulation of early to close out positions when Sumitomo - was written by Mr gence of a potentially manipula- as 1985, but certainly in 1991-96.

tion of aggregated position information can act as a significant impediment to manipulation."

Mr Gilbert urges the SIB to introduce a US-style system for all London markets. The US Commodities Futures Trading Commission requires clients with large positions to report exchange positions every Tuesday. The information is released in aggregate form in weekly reports.

Mr Gilbert argues that Sumitomo manipulated the world cop-

Act does not make warket manipulation illegal - even though the Securities and Investment Board, the UK securities watchdog, suggests it does. The act should be changed "to make illegal any exercise of monopoly power in futures markets which has the effect of generating artificial off-

exchange prices". US experience suggests prosecutions are difficult to bring. "The emphasis should be on prevention rather than prosecution. And the key element in prevention is client position reporting," ha says.

While this would force the introduction of an element of extra-territoriality into financial services legislation, "the fact that financial transactions can easily be relocated across national boundaries" makes it inevitable. "From this perspective, the practical issue is to avoid conflicts between the reg-

ulations introduced by different regulators," he says.

Mr Gilbert suggests it would be because of its very close links straightforward to extend client with the metals industry. "Some position reporting to all London of these differences, in particular markets on a statutory basis. non-cash clearing and the use of historic price carries, are unwise and impose additional risks on LME members, but they do not raise regulatory concerns.

The LME is considering changing its regulations so the executive would be able to obtain more information on members' and their clients' operations and to give it more jurisdiction over put pressure on prices early them. The SIB is reviewing regu-Mr Gilbert says the LME differs lation at the LME. Its report is from other futures markets expected later this month.

Copper up despite rise in stocks

MARKETS REPORT

Another rise in the Landon Metal Exchange copper stocks reported yesterday on but in late trading copper for delivery in three months had recovered to \$2.136 a tonne, up \$3.

Some analysts are sugresting copper prices might jump again in the new year because the market remains immediate delivery on the LME yesterday comma a premium over three-monti metal of \$138 a tonne.

Mr Wiktor Bielski, analysi at Deutsche Morgan Greufell. said: "One factor to watch over the next three or four weeks is Chinese buying. In past years when Chinese imports have been at high levels, large purchas have been booked for physi cal delivery in the week between Christmas and new year - which has resulted in significant price movement in the new year.

"Clearly, if this pattern were repeated this year, LME stocke could fall sharply and eubsequent price movements could be equally dramatic."

Mr Larry Kaplan at Flemings Global Mining Gronp said: "On balance our view remains that this is a short-term rally [in the copper price] within a long-term downtrend, but with the caveat that current low stock levels could still allow for further price spikes in the near future."

Gold closed in London near its three-year low at \$368.25 a troy onnce, down 70 cents. "The market now has a tired year-end feel to it and book squaring is expected to dominate over the next few weeks," said

FT. KIL

Stainless steel loses its shine

Deborah Hargreaves says world-wide oversupply has led to expectations of widespread rationalisation in European plants

Stainless steel prices business, but also more warn against any optimism have collapsed this lucrative than producing in the sector. Carcle said on year as world produc commodity steel. Demand Monday there was unlikely tion has grown twice as fast as demand for the past 18 months, leading to the expectation of widespread rationalisation among Euro-

and forced Carclo Engineering, the specialist steel and wire maker, to issue a prof-

its warning on Monday. The decline in the stainless steel market bas been building for come time, according to Mr Peter Fish, managing director at Meps steel consultants in Sheffield. "The market is oversupplied, inventories are excessive and a significant amount of new capacity is Mr Fish said supply in Europe, the US and Japan was around 1m tonnes

higher than demand at the start of the year - equal to some 10 per cent of 1995 supply. In addition, more than 1.5m tonnes of new capacity was scheduled to come on stream this year and next.

has been growing by 4.5 per cent to 5 per cent a year from domestic appliance

makers and the car industry. But the problem has been that steel mills, keen to The 40 per cent drop in move into a value-added sec-prices pushed down profits tor, have been investing in at British Steel'e Avesta unit new capacity at a rate of almost 10 per cent a year for

nearly two years. As prices rose on the back of a surging nickel market last year, consumers built up stocks, but this year they started to offload those on to a weak market. "Now it'e all fallen down like a pack of cards." said Mr Fish

Commodity steel prices have not been as volatile as the etainless market as demand increases have been slower and mills have not invested in large capacity increases. But British Steel has warned that the recent strength of sterling has hurt its chances of selling in France and Germany. Demand for commodity

steel grades is rising by some 11/4 to 2 per cent a year. Analysts believe the market for stainless could have hit its bottom, although they

to be a rebound and the company had failed to see any pick up in the market.

"It looks like there is a fragile upturn in the market because most of the destocking is over and tha nickel price is lower, which means companies can push through some increase in base prices," said Mr Fidelis Madavo, research manager for stainless steel at CRU International in London

Most stainless prices are quoted with an alloy surcharge to take account of the cost of nickel or chrome. These are based on an average of London Metal Exchange prices. When alloy surcharges are low producers are more successful in pushing through rises in the underlying price .

The average nickel price has slipped this year to an estimated \$3.48 a lb from \$3.73 per lb last year. However, analysts expect the market to pick up again next year to \$4.25 a lb as new stainless steel producers compete for market share. Mr Madavo says stainless prices in Germany, Europe's

low point five months ago to DM2.50-DM2.60 a kg. but this is not as much as com-panies would like.

European mills could find it difficult to push for higher prices next year following big increases in capacity among cheaper producers like Taiwan and Korea.

European producers have traditionally sold off surplus output to the export market, but now east Asian mills are producing their own supplies and the market is extremely competitive. This could force further restructuring of the European market.

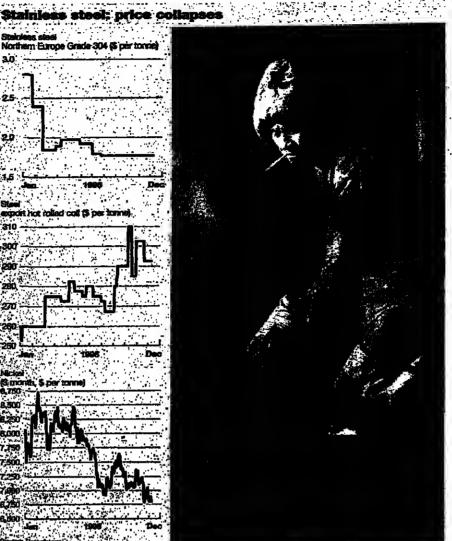

Mr Fish believes stainless production will have to be held at 14.5m tonnes to bring supply and demand more closely into line; this represents a drop of 500,000 tonnes on 1995 output. He also warns producers

against expecting any sustained upturn in the market, pointing out that the last time there was a big jump in stainless steel capacity, in 1987 and 1988, the over-supply caused a steady price reduction that lasted four years in Germany and three

LONDON STOCK EXCHANGE

Footsie baffles bears with further recovery

MARKETS REPORT

By Peter John

London stocks pushed forward to surprise the pessimists and leave last Friday's slide no more than a misty memory.

A rush of genuine buying, which partly reflected US interest, partly takeover speculation and partly year-end restructuring of portfolios, saw the FTSE 100 index gain 24.1 to 4,035.7.

That rise, combined with Monday's 48.6-point gain, almost made up for Friday's fall, which was prompted by cautious comments from Mr Alan Greenspan, tha chairman of the US Federal might choose to increase rates prices in the cash market.

Reserve. With the Dow Jones following today's meeting with Industrial Average up by 82 points overnight, London opened with a fair wind behind it.

Monday filling to short positions, Wall Street's example was almost certain to squeeze prices higher. Mr Greenspan's earlier comments reflected nothing more than the market consensus that interest

They said hikes in the US and UK have both been factored into

the chancellor of the exchequer

the governor of the Bank of within striking distance of its financial sectors of the market, England faded away.

A rise so soon after the Budget And, as most dealers had spent would be seen as a sign that the chancellor had failed to tighten fiscal policy sufficiently. And the latest British Retail Consortium Also, earlier worries began to survey showed retail sales recede. Strategists decided that growth was beginning to slow, adding to Monday's benign producer price data. Consequently, government bonds were strong throughout the day.

In the afternoon, Wall Street opened up again and moved New York equivalents noticed ahead by more than 30 points to Additionally, any prospect that prompt a rush of buying in UK futures, which in turn supported

previous peak - 4,078.1 - have been prevalent for some achieved in October, Meanwhile the FTSE 250 index gained 26.9 to National both had an early 4.411.9.

Lasmo outpaces **Footsie**

By Steve Thompson, Joel Kibazo and Lisa Wood

Oil exploration group Lasmo powered to the top of the FTSE 100 performance table on the back of two exciting, but speculative, stories.

The first was a suggestion that the company's drilling operations off the coast of Algeria, already viewed as extremely successful, had borne further fruit.

The second and much more speculative story was that a takeover bid for the group could be in the making. There was a buzz around the market that Shell had run its slide rule

over the company.
Royal Dutch/Shell was widely rumoured recently to have been interested in bidding for British Gas. Questioned as to its interest in making a bid for Gas, Mr Cor Herkstroter, Royal recent profit upgrades and Dutch's chairman said the company was "looking at 530p many opportunities for takeovers but not at British the day's heaviest traded

Oil sector specialists were inclined to give much more credibility to the Algerian drilling story than to the takeover rumour.

Lasmo sbares, boosted recently by the long drawnout auction of Sante Fe. the North Sea oil division of the Philip Morris. Kuwait Petroleum Corpora-

Throover of 3m shares was not buge by recent stan-

rates have to rise.

Barclays Bank hit a new high, gaining 18% to 1036p with most of the gains seen late in the session following an announcement of a dis-

The group yesterday confirmed the sale of its global institutional custody business to Morgan Stanley.

The stock bad moved ahead early in the session boosted by a recommendation from Credit Lyonnais Laing. CLL said it sees "good trading in existing businesses" and is maintaining its top-of-the-range profits estimate for the coming year at £2.62bn, against rival forecasts in the region of of 2.5m.

Merrill Lynch was also to 831/2p. reported to favour the stock. In the rest of the sector. Cazenove was said to have been behind the advance seen in Lloyds TSB. The shares bardened 81/2 to 424p, following trade of 9.4m. Royal Bank of Scotland continued in favour, boosted by the shares gained 121/2 to

BAT Industries was one of stocks in the Footsie, Turnover at the close stood at a hefty 23m with the shares having improved 11% to 488p, amid continuing of The Internal restructuring talk. Sentiment was also boosted by the overnight strength on Wall Street seen in US group

Talk that BAT was plan-

insurance groups viewed as most likely to attract BAT's attention are Commercial Union and General Accideut. Guardian Royal Exchange's restructuring plans announced yesterday are thought to have ruled

the company out as a poten-

tial target. Shares in CU firmed 31/4 to 668p, while those in GA moved 9 ahead to 7221/sp. GRE closed 4½ up at 268½p. BAT was also said to be considering a bid for Imperial Tobacco, the UK group recently demerged from

Hanson. Shares in Imperial moved 9 ahead to 378%p. Turnover of 8.1m was said to have included a single buyer

Hanson shares firmed 1% Bid talk continued to do

late. The two composite about such a bid once again pointed to Prudential. There are those in the market who continue to believe it is only a matter of time before the UK assurance group mounts a bid or announces an alliance with retail banking group Abbey National. Shares in the former sur-

rendered 21/4 to 4830 after trade of 7.6m, while those of the latter jumped 17% to 708%p, with some 3.5m having been traded by the close. Dealers expect Abbey National to continue powering ahead irrespective of the bid rumours. The stock has been benefitting from the recent ending of the mortgage rate war - a fact analysts suggest will boost the

Philip Morris

nology index had gained 0.4

Industry Association said that the ratio of orders taken to orders filled - a key meaeure of chip demand - rose to its highest level this year. That oews belped chip companies such as Intel, up \$2% at \$132%. Texas Instrument. \$% stronger at \$67%, and Motorola, which added \$% at

Dell Computer and Microsoft, both of which split their stock this week, posted

Dell advanced \$31/4 at \$63% and Microsoft climbed \$2%

Adding to strength in technology shares was a gain of \$4% or 8 per cent to \$64% by gungs for \$164m. Netscape Communications. the Internet software com-

Netscape announced early yesterday that it had reached an agreement with five of the regional tele-

Internet services. Continued strength in Philip Morris helped to boost the Dow Jones Industrial

By 1 pm the blue chip index was 28.32 stronger at 6.492.26. having earlier and just over DM60 a month moved above the 6.500-mark and then fallen back. The Standard & Poor's 500 added 1.50 at 751.26. Volume on the NYSE came to 249m shares.

By midday yesterday, shares in Philip Morris had added more than \$13 since the start of the month with a gain of \$21/4 at \$1161/4. The move had come in the wake of several upgrades by analysts and general strength in shares of consumer products

companies. sector continued to show strength with the Morgan Stanley index of such companies advancing 0.3 per cent, while the counterpart index of cyclical shares added just 0.1 per cent.

Black & Decker shares lost \$6% or 16 per cent et \$31% after the company warned that fourth quarter earnings would not meet analysts stimates and would proba-After the market closed on bly fall below \$1 per share Monday, the Semiconductor because of weakness in power tool sales.

> TORONTO continued to gain ground, advancing on a broad front in a morning sesslon dominated by the healthy trend on Wall Street. At noon, the 300 composite index was np 38.66 et 5.945.20

All but one of the index's 14 sub groups were ahead, consumer products putting up the strongest performance with an improvement Potash Corp of Saskatch-

ewan surged C\$6.35 to C\$117.35 on the acquisition of a 51 per cent stake in Germany's Kali und Salz Beteili-Among blue-chips, Alcan

Aluminium added 20 cents to C\$47.20 and Canadian Pacific put on 60 cents to C\$36.85. Royal Bank of Canada rose 45 cents to C\$48.85.

Among golds, Barrick Gold phone companies to provide hardened 5 cents to C\$40.10.

Rise in chip Hoechst gains, Clariant rockets on merger

EUROPE The latest cross-border restructuring deal moved a lot of money around. Hoechst, which said that its speciality chemicals merger with Clariant of Switzerland could save each group DM600m a year, climbed DM2.45 or 3.6 per cent to

The German chemicals group, a byword for restructuring and the pursuit of shareholder value, had doubled its effective share price between DM30 in mid-1995 ago; at that point, it saw a further series of broker buy

DM71.22

recommendations. Clariant, the speciality chemicals business spun off by Sandoz last year, rocketed 13.4 per cent as the market digested news of the merger, which could leave Hoechst with 40 per cent of

the Swiss group. The shares were SFr60 higher at SFr508 on the view that the deal would be positive in terms of products and future business, even if the geographical fit of the two companies, heavily weighted in Europe, was not ideal.

One analyst tentatively set target price for the Clariant sbares of SFr700, but added that even that might prove conservative
